Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Backend Software Engineer pursuing an MSCS at USC with 2+ years building data ingestion pipelines, scaled storage, and low-latency APIs across distributed systems, with healthcare-integration and third-party API experience, strong CS fundamentals, and clean, well-tested production code.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **high-throughput data ingestion pipelines** and scaled multi-tenant storage on SQL and cloud services for 500+ users, optimizing queries for low-latency serving from 1.2s to 350ms.
- Debugged **distributed async orchestration** with explicit job-state transitions and failure isolation, processing 5K+ monthly jobs with CI/CD at 99%+ production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built and shipped **backend features and REST APIs** handling 10K+ daily requests for 150+ users, writing clean, well-tested production code with concurrent processing.
- Participated in **code reviews and architecture discussions** in a senior team, debugging performance issues and reducing turnaround **60%** under high load.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **large-scale API integrations and ETL pipelines** (AWS Glue, S3) with OOP fundamentals and 20+ test suites, improving response times **30%** and pipeline efficiency **68%**.
- Built distributed **CI/CD and integration testing** across three platforms, collaborating with external stakeholders in Agile sprints to ship reliable production software.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed a **microservice platform** with MongoDB and REST APIs across eight services, integrating third-party payment and **webhook** workflows syncing 2M+ records.
- Automated **Docker/Jenkins CI/CD** on Azure with monitoring and real-time WebSockets, cutting deployment time **50%** and improving scalability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **Flask backend APIs and third-party integrations** (payments, webhooks) for a healthcare-adjacent booking platform across 50K+ records with sub-200ms responses.
- Integrated **Firebase real-time data serving** and analytics pipelines, performing root cause analysis to reduce manual handling **70%**.

Skills

Languages: Python, Java, SQL, JavaScript/TypeScript, C++, Bash
Backend & APIs: FastAPI, Flask, Spring Boot, Node.js, REST APIs, Webhooks, Microservices
Core CS: Data Structures, Algorithms, OOP, Functional Programming, System Design, Distributed Systems
Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Query Optimization, Data Modeling
Data & Pipelines: ETL, Data Ingestion, Scaled Storage, Low-Latency Serving, Caching, Async Processing
Cloud & Practices: AWS, Azure, GCP, Docker, Kubernetes, CI/CD, Code Reviews, Healthcare Integrations

Projects

HMIS Live | *MERN, ABDM EHR APIs, Microservices*

- Built a **healthcare integration platform** (MERN) connecting India's ABDM EHR APIs with consent-based record access and microservices, managing 100+ daily clinical workflows.

FinNexus Live | *Plaid, Webhooks, Kubernetes, MongoDB*

- Built a **third-party integration platform** (Plaid, webhooks) on Kubernetes serving 50K+ users and 1M+ transactions with real-time, low-latency data serving.

Big-Brain Live | *GCP, PostgreSQL, REST APIs, FAISS*

- Built a **data ingestion and indexing pipeline** on GCP processing 50K+ records with scaled storage, incremental updates, and tuning that cut retrieval latency **40%**.
