Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Associate software engineer with 2+ years building **Java/Spring Boot** and **Python** automation services, **SQL** data pipelines, and cloud integrations on **Azure/AWS** using **Docker**, **Kubernetes**, and **Jenkins/GitHub Actions** CI/CD for healthcare-adjacent enterprise workflows.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Database Systems, Software Engineering, Analysis of Algorithms, Computer Networks

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Structures

Experience

USC Dornsife **Los Angeles, CA**
Associate Software Engineer *September 2025 – Present*
- Built **Python/FastAPI** and **Azure SQL** pipelines for 500+ users with validation, reconciliation, and row-level controls across legacy/cloud data flows supporting consistent **de-identification-style** handling for 5K+ monthly jobs.
- Automated integration testing and **CI/CD** releases with enterprise **AI tools**, achieving **99%+ reliability** while documenting deliverables and partnering with engineers, QA, and product owners on structured service requests.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **Python/Flask** automation and REST APIs handling **10K+ daily requests**, reducing manual turnaround by **60%** through continuous process improvement and cross-functional collaboration with engineering and product partners.
- Deployed production changes via **GitHub Actions** with reproducible validation, partnering on requirements, defect triage, and release readiness in a fast-paced Agile environment supporting offshore-aligned delivery schedules.

USC AD Labs **Los Angeles, CA**
Software Engineering Assistant *January 2025 – May 2025*
- Implemented data processing across **100K+ records** with reproducible tests, documentation, and cross-application **data-flow** analysis supporting integration validation across interconnected platform components and downstream consumers.
- Partnered with senior engineers on automation opportunities, technical recommendations, and iterative delivery while communicating clearly across QA and development stakeholders during structured platform enhancement and service-request fulfillment.

Aasma Technology Solutions **India**
Java Developer - (SecureSync) *August 2023 – July 2024*
- Engineered **Java/Spring Boot microservices** and **AWS Glue/S3 ETL** flows, improving API response by **30%** while mapping cross-application data movement for consistent downstream processing and **masking-ready** transformations across distributed systems.
- Maintained **20+ automated suites** in **Jenkins CI/CD**, increasing release confidence by **68%** through unit, integration, and nightly jobs supporting UAT infrastructure validation across Windows/Linux enterprise environments.

Aasma Technology Solutions **India**
Software Engineer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **Azure SQL** services with **Docker** and **Jenkins** automation across 2M+ records, cutting release cycles by **50%** while improving consistency across cloud-connected microservices, reporting workflows, and staged UAT-style deployment paths.
- Contributed to automation projects replacing manual release steps with pipeline-driven builds, tests, and deployments while collaborating with developers and QA on defect tracking, deliverable documentation, and continuous process-improvement initiatives.

Skills

Core: **Java**, **Spring Boot**, **Python**, Go (familiar), REST APIs, microservices, Maven, JUnit, Mockito, Agile, Git
Data: **SQL**, **Oracle**, DB2 (familiar), PostgreSQL, SQL Server, **Azure SQL**, ETL, **data masking**, **de-identification**, distributed databases, data-flow analysis, healthcare data
Cloud & CI/CD: **Azure**, **AWS**, GCP (familiar), **Docker**, **Kubernetes**, **Jenkins**, **GitHub Actions**, Azure DevOps (familiar), CI/CD, AWS Glue, automation, legacy/cloud integration, UAT support, enterprise AI tools

Projects

Chat2SQL Code | *Java, Spring Boot, Oracle, Docker*
- Built **Java/Spring Boot** services with **Oracle**, PostgreSQL, and MongoDB integrations plus **Docker** workflows and automated validation for secure multi-database access across distributed enterprise application environments and SQL-driven tooling.

HMIS Live | *Healthcare APIs, SQL, Secure Data Access*
- Developed a healthcare platform with consent-based patient-record APIs, appointment workflows, and structured schemas supporting secure regulated data-handling patterns aligned with clinical operations and payer-adjacent enterprise system requirements.

Linguistix Code | *Python, AWS, Docker, Pipeline Automation*
- Deployed automated **Python** pipelines on **AWS** with **Docker**, validation gates, and repeatable CI-style releases, reducing manual steps across high-throughput ingestion and transformation workflows supporting continuous process-improvement automation goals.
