Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer pursuing an MSCS at USC with 2+ years owning software release pipelines, configuration management, validation, and root cause analysis across CI/CD environments, delivering high-quality, reliable releases through cross-functional and supplier collaboration.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, Object-Oriented Programming, Software Engineering, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Owned **release workflows and validation** for data pipelines across 5K+ monthly jobs, implementing reconciliation checks and configuration controls to maintain 99%+ production reliability.
- Performed **root cause analysis** on data integrity issues across schemas and systems, troubleshooting and resolving defects to ensure launch-ready, high-quality deliverables.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Managed **CI/CD release pipelines** delivering production features to 150+ users, validating functionality and remediating defects to ensure reliable, launch-ready software.
- Tracked and communicated **release readiness** across development, test, and production environments, reducing turnaround **60%** while maintaining quality standards.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Owned **end-to-end software release control** with multi-stage branches (feature, development, staging, production), automating nightly builds, validation, and integration/unit testing across three platforms.
- Coordinated with **external Microsoft/GitHub stakeholders** in Agile sprints, authoring release documentation and configuration definitions while boosting pipeline efficiency **68%**.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Managed **configuration and release management** with manual approval gates and rolling, zero-downtime deployments via Jenkins, ARM templates, and Docker across staging and production.
- Built **monitoring and validation** (Sentry, Kibana) with DevSecOps checks (Snyk, OWASP), cutting deployment time **50%** and ensuring reliable, scalable releases.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Translated **client and business requirements** into technical configurations, mapping 12+ integration points and presenting end-to-end system architecture for launch alignment.
- Troubleshot **production issues** via webhook automation and logging, performing root cause analysis to reduce manual handling **70%** across cross-functional teams.

Skills

Languages: C++, Python, Java, JavaScript/TypeScript, SQL, Bash
Release & Config: Release Management, Configuration Management, Change Management (ECN), Version Control (Git), Branching Strategies, Build Automation
CI/CD & DevOps: Jenkins, GitHub Actions, GitLab CI, Docker, Kubernetes, ARM Templates, Deployment Automation
Testing & Validation: Unit Testing, Integration Testing, Validation, Defect Remediation, Root Cause Analysis, PyTest
Tools: Microsoft Office, JIRA, Postman, Linux, Monitoring (Sentry, Kibana), Splunk
Practices: Agile/Scrum, Requirements Analysis, Cross-functional Collaboration, Documentation, Supplier Coordination

Projects

CPU Scheduling Simulator Live | *C++, React.js, OS Internals*

- Built a **C++ systems simulator** implementing six scheduling algorithms (FCFS, SJF, RR, MLQ) with performance analysis, reducing average turnaround time **25%** and debugging time **20%**.

Linguistix | *Python, AWS (ECS/Fargate), Docker, CI/CD*

- Developed a **containerized data-processing API** on AWS with automated CI/CD releases, validation checks, and 87% accuracy at production-grade reliability.

FinNexus Live | *Kubernetes, CI/CD, MongoDB*

- Built a **scalable platform** on Kubernetes with automated CI/CD deployment, configuration management, and release validation supporting 50K+ users and 1M+ transactions.
