Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer pursuing an MSCS at USC with 2+ years building **Python** and **Java** backend services, **RESTful APIs**, and **PostgreSQL**-backed systems with unit testing, logging, monitoring, and production reliability focus.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, OOP, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **Python** platform services on **FastAPI** and **PostgreSQL** for 500+ users, reducing request latency from **1.2s to 350ms** through query tuning, indexing optimization, and performance-focused backend design.
- Implemented automated validation and ETL pipelines for 5K+ monthly jobs with **CI/CD** releases, reconciliation checks, and structured logging while maintaining 99%+ production reliability across recurring workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **Flask** backend services and **RESTful APIs** handling 10K+ daily requests for 150+ users, writing tested code with secure ingestion, validation, and stable performance under production load.
- Participated in code reviews and technical discussions, documenting API behavior and reducing feedback turnaround **60%** while supporting maintainability, knowledge sharing, and rapid cross-functional iteration.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **REST API** microservices and AWS Glue ETL integrations, improving response times **30%** while supporting distributed workflows, resilient data movement, and stable delivery across production environments.
- Maintained 20+ automated test suites with **PyTest** and **Mockito** in Jenkins **CI/CD** pipelines, increasing pipeline reliability **68%** and diagnosing production issues through logging and validation reports.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **REST APIs** and WebSocket synchronization across eight microservices, syncing 2M+ records with low-latency updates and relational schema design on **Azure SQL** for high-volume workflows.
- Automated Docker and Jenkins **CI/CD** releases with validation gates, cutting deployment time **50%** while improving observability through **Sentry**, Azure Monitor, and production defect triage.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **Flask REST APIs** and webhook payment workflows for 50K+ records with sub-200ms responses, idempotent event handling, and cross-platform synchronization across 12+ integration points.
- Monitored and debugged backend systems using logging traces, reducing manual handling **70%** while documenting API behavior and collaborating on ambiguous integration requirements with cross-functional partners.

Skills

Languages: Python, Java, SQL, JavaScript, TypeScript, Bash
Backend & APIs: FastAPI, Flask, Node.js, RESTful APIs, microservices, backend frameworks, API documentation
Databases: PostgreSQL, MySQL, SQL Server, Azure SQL, relational schema design, query tuning, data modeling
Testing & Observability: PyTest, Mockito, Jest, unit testing, integration testing, logging, monitoring, Sentry
Cloud & Tools: AWS, Docker, Kubernetes, CI/CD, Jenkins, Git, GitHub, Agile, performance optimization

Projects

FinNexus Live | *Next.js, TypeScript, WebSockets, Kubernetes*

- Built a fintech platform with secure APIs and WebSockets for 50K+ users and 1M+ transactions, emphasizing backend reliability, real-time updates, and Kubernetes-backed deployment automation.

Chat2SQL Code | *Java, TypeScript, PostgreSQL, Docker*

- Built a **Java** and TypeScript SQL workspace supporting 10+ relational databases with schema-aware APIs, Docker deployments, and tested query-generation workflows for developer productivity.

Linguistix Code | *Python, AWS, Docker, CI/CD*

- Built a containerized **REST processing API** on AWS ECS with automated validation gates, improving production reliability, reducing deployment variance, and streamlining backend troubleshooting workflows.
