Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software developer with 2+ years building **ERP-style** business applications using **C#/.NET**, **Java**, **Python**, and **SQL** across manufacturing and services workflows. Experienced extending data platforms, supporting operations teams, and delivering reliable enterprise software in fast-paced environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Database Systems, Software Engineering, Analysis of Algorithms, Computer Networks

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Object-Oriented Programming, Data Structures, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Developer *September 2025 – Present*

- Built **Python** and **SQL Server/PostgreSQL** data services for 500+ users, designing normalized schemas, validation rules, and reporting workflows that support consistent enterprise data handling across **5K+ monthly** operational jobs.
- Improved dashboard and integration performance from **1.2s to 350ms** through query tuning and indexing, partnering with stakeholders to document deliverables and support production releases for services-oriented platform teams.

Grad8 **Los Angeles, CA**
Software Developer Intern *June 2025 – August 2025*

- Developed **Python** service modules and REST APIs handling **10K+ daily requests**, automating instructor workflows, reducing manual processing by **60%**, and supporting reliable services delivery in a fast-paced product environment.
- Deployed production updates with automated validation and structured logging, collaborating with engineering and operations partners on defect triage, requirements clarification, and maintainable business-application enhancements.

Aasma Technology Solutions **India**
Software Developer - (SecureSync) *August 2023 – July 2024*

- Engineered **Java** microservices and **Python** ETL integrations with **SQL** backends, improving API response by **30%** while supporting cross-platform data-sharing workflows used by manufacturing and enterprise services teams.
- Maintained **20+ automated test suites** in CI pipelines across Windows and Linux, increasing release confidence by **68%** and reducing manual QA effort for business-critical software used in distributed operational environments.

Aasma Technology Solutions **India**
Software Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **ERP-style CRM** features with **Azure SQL**, REST APIs, and real-time updates across billing, inventory, lead management, and resource allocation modules supporting **2M+ records** for manufacturing and services operations.
- Automated Docker/Jenkins deployment flows cutting release cycles by **50%**, improving reporting accuracy and operational visibility for cross-location teams managing customers, vendors, invoices, and service scheduling workflows.

MedDevice Test Systems **India**
Software Developer Intern *January 2023 – April 2023*

- Implemented **Python** libraries and **SQL**-backed test workflows for connected manufacturing devices, encoding lifecycle scenarios with deterministic logs, simulators, and validation checks suitable for regulated production support environments.
- Integrated automated test suites into CI pipelines with standardized reporting, enabling operations and engineering teams to review coverage, debug intermittent failures, and improve reliability across device communication and services workflows.

Skills

Languages: **C#**, **.NET**, **Java**, **Python**, SQL, JavaScript, Bash, OOP, design patterns
ERP & Data: **SQL Server**, PostgreSQL, Azure SQL, MySQL, MongoDB, ETL, reporting workflows, ERP development, manufacturing systems, services operations, REST APIs, microservices, business applications
Tools: ASP.NET (familiar), Spring Boot, Git, Jenkins, Docker, Windows, Linux, Agile, NetSuite (familiar), CI/CD, automated testing, technical documentation, cross-functional support, production troubleshooting

Projects

HMIS Live | *TypeScript, SQL, Enterprise Operations Software*

- Developed hospital operations software with appointment scheduling, patient-record workflows, and structured **SQL** schemas, demonstrating ERP-adjacent modules for regulated services organizations with role-based access and operational reporting requirements.

Chat2SQL Code | *Java, SQL Server, PostgreSQL, Docker*

- Built **Java** services integrating **SQL Server**, PostgreSQL, and MongoDB with Docker-based deployment, supporting schema exploration, query productivity, and multi-database management workflows common in enterprise ERP and reporting environments.

Linguistix Code | *Python, SQL, AWS, Pipeline Automation*

- Deployed automated **Python** data pipelines on AWS with validation gates and repeatable releases, reducing manual processing across ingestion and transformation workflows supporting manufacturing-style operational data movement and services reporting needs.
