Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer pursuing an MSCS at USC with 2+ years building web and cloud applications on Microsoft Azure and SQL Server, designing schemas, stored procedures, and integration packages, and delivering full-lifecycle solutions with TypeScript, React, and Agile practices in finance-focused domains.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Designed **Azure SQL and SQL Server schemas, stored procedures, and integration pipelines** for 500+ users, optimizing indexing and queries to cut dashboard latency from 1.2s to 350ms.
- Built **ETL integration packages** with data validation, reconciliation, and release workflows across 5K+ monthly jobs, maintaining 99%+ reliability through CI/CD and troubleshooting.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **full-stack web applications** (React, Python) with Web APIs for 150+ users, applying unit testing, code reviews, and CI/CD across the software lifecycle for 10K+ daily requests.
- Remediated defects and **troubleshot performance issues** under peak load, reducing turnaround time **60%** while adhering to engineering standards and clean documentation.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **web service APIs** with OOP design patterns and 20+ unit/integration test suites, driving **DevOps and release management** via Jenkins CI/CD across three operating systems.
- Optimized large-scale integrations improving response times **30%**, collaborating in **Agile sprints** with stakeholders to analyze requirements and deliver quality software.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built a full-stack platform on **Azure (App Services, Azure SQL, ARM templates)** with eight microservices, modeling structured schemas for billing, customers, and reporting across 2M+ records.
- Automated **Azure DevOps-style CI/CD** (Jenkins, Docker) with monitoring and security checks, cutting deployment time **50%** and ensuring code quality and performance.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **backend APIs** (Spring Boot, Flask) for a financial booking and **payment platform** across 50K+ records, integrating multi-currency billing with sub-200ms responses.
- Developed **TypeScript and React** interfaces with real-time sync and presented system architecture to clients, aligning technical feasibility with business needs.

Skills

Languages: Java, JavaScript/TypeScript, Python, SQL, C++, Bash
Web & Frameworks: React, Angular, Next.js, Node.js, REST/Web APIs, HTML/CSS
Databases: Azure SQL, SQL Server, PostgreSQL, MongoDB (NoSQL), MySQL, Stored Procedures
Azure & DevOps: Microsoft Azure, App Services, ARM Templates, Azure DevOps, GitHub, CI/CD, Docker
Data & BI: ETL / Integration Packages, Data Modeling, Schema Design, BI Dashboards, Analytics
Practices: Agile, Unit Testing, Code Reviews, Release Management, Troubleshooting, Documentation

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*

- Built a **fintech platform** (Next.js, TypeScript) for 50K+ users and 1M+ transactions with secure bank linking, real-time updates, and token-based access control.

Chat2SQL Code | *SQL Server, Azure SQL, Java, TypeScript*

- Built an **AI-powered SQL workspace** supporting SQL Server, Azure SQL, and 8 other databases with schema-aware query generation and stored-procedure-style execution.

HMIS Live | *MERN, TypeScript, Sentry*

- Built a **full-stack platform** (MERN, TypeScript) with reporting dashboards, consent-based access, and Sentry monitoring, reducing administrative workload **30%**.
