Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Java Software Engineer pursuing an MSCS at USC with 2+ years building **secure, testable backend components and features**, supporting production systems, and applying OOP, data structures, and AI-assisted development across SaaS and regulated domains.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Software Engineering, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Database Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **backend components and features** on SQL-backed services for 500+ users, troubleshooting and optimizing queries to cut latency from 1.2s to 350ms while maintaining secure, maintainable code.
- Supported **production systems** with monitoring, validation, and incident follow-up across 5K+ monthly jobs, integrating CI/CD for 99%+ reliability and rapid defect resolution.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Implemented **features and defect fixes** with automated testing and code reviews handling 10K+ daily requests, validating delivered functionality and shipping maintainable production code.
- Used **AI-assisted development tools** (Cursor, Claude) for coding, testing, and documentation while retaining ownership of output quality, accelerating delivery for 150+ users.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Built **Java components and APIs** using OOP design patterns and data structures with Mockito unit testing, improving response times **30%** while writing secure, testable, maintainable code.
- Participated in **code reviews, sprint planning, and troubleshooting**, maintaining 20+ automated tests in CI/CD (Jenkins, PyTest) and increasing reliability **68%** with documented design intent.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed **microservice features** (React, Node.js) across eight workflows syncing 2M+ records, with role-based access and documented technical assumptions for maintainability.
- Supported **production systems** with Sentry and Azure Monitor for monitoring and incident response, automating Docker deployments via Jenkins and cutting release time **50%**.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **Spring Boot and Flask backend features** and defect fixes for a SaaS application across 50K+ records, integrating secure payment workflows with sub-200ms responses.
- Troubleshot **production issues** via webhook automation and logging, reducing manual handling **70%**, and documented integration architecture for technical and business stakeholders.

Skills

Languages: Java, Python, JavaScript/TypeScript, SQL, C++, Bash
Core CS: Data Structures, Algorithms, Object-Oriented Design, Software Testing, Debugging, System Design
Backend & APIs: Java Spring Boot, Flask, FastAPI, Node.js, REST APIs, Microservices
Databases: PostgreSQL, Oracle, MySQL, SQL Server, MongoDB, Azure SQL
Testing & Practices: Unit Testing, Integration Testing, PyTest, Mockito, Code Reviews, Agile, CI/CD
Cloud & Tools: AWS, Azure, Docker, Jenkins, Git/GitHub, Monitoring, AI Dev Tools (Cursor), Documentation

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Built an **AI-powered SQL workspace** in a Java and TypeScript codebase supporting 10+ databases with OOP design, schema-aware querying, and Docker-backed deployment.

HMIS Live | *MERN, TypeScript, Regulated Domain*

- Built a **healthcare workflow platform** (MERN, TypeScript) with consent-based access, appointment workflows, and notifications in a regulated domain, reducing administrative workload **30%**.

FinNexus Live | *SaaS, Kubernetes, MongoDB*

- Built a **secure SaaS platform** handling 1M+ transactions for 50K+ users with token-based access, real-time updates, and CI/CD in a compliance-sensitive financial domain.
