Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer pursuing an MSCS at USC with 2+ years building **TypeScript/React** product features, **Python** services, and **REST/WebSocket APIs** with cross-platform delivery, realtime updates, and developer-focused integrations in collaborative Agile teams.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Advanced NLP, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, OOP, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Shipped full-stack platform features with **Python/FastAPI** and PostgreSQL for 500+ users, owning design through deployment with validation, documentation, and **CI/CD** at 99%+ reliability.
- Collaborated with cross-functional partners to break requirements into milestones, optimize performance from 1.2s to 350ms latency, and iterate on UX using **AI-assisted** development workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Built **TypeScript/React** product features with **Python** backend **APIs** for 150+ users, handling 10K+ daily requests with code reviews, testing, and end-to-end ownership from design through launch.
- Partnered with stakeholders to refine UX, resolve defects via debugging, and cut turnaround **60%** while maintaining stable production performance during rapid iteration cycles.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **REST API** services and integrations with automated testing across **Windows, Linux, and macOS**, improving response times **30%** for cross-platform developer-facing workflows.
- Collaborated in Agile code reviews and sprint planning, boosting pipeline efficiency **68%** while documenting API behavior and troubleshooting production issues independently.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **realtime WebSocket** features and **REST APIs** across eight microservices, syncing 2M+ records with low-latency updates for user-facing product workflows on **React/Node.js**.
- Shipped Docker and Jenkins **CI/CD** releases with validation gates, cutting deployment time **50%** while improving UI responsiveness and product quality for operational users.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Developed **React/TypeScript** web and **React Native** mobile experiences with Python Flask **APIs**, delivering sub-200ms responses across 50K+ records and 12+ integration points.
- Owned bug fixes and architecture documentation, reducing manual handling **70%** while collaborating with designers and stakeholders through ambiguous requirements.

Skills

Languages: TypeScript, JavaScript, Python, C++, SQL, Bash
Frontend: React.js, Next.js, HTML, CSS, TailwindCSS, Responsive UI, Product Collaboration
Backend & Realtime: REST APIs, WebSockets, FastAPI, Flask, Node.js, Microservices, API Design
Platforms: Cross-Platform Development, Linux, Windows, macOS, AWS, Azure, Docker, CI/CD, Git
Practices: Agile, Code Reviews, Documentation, Performance Optimization, AI-Assisted Development

Projects

FinNexus Live | *Next.js, TypeScript, WebSockets, Kubernetes*
- Built a full-stack **Next.js/TypeScript** platform with **realtime synchronization** for 50K+ users and 1M+ transactions, focusing on responsive UX, secure access, and scalable API design.

Big-Brain Live | *React, PostgreSQL, Real-Time Collaboration*
- Built a product platform with **real-time collaboration**, semantic search, and polished UI over 50K+ records, prioritizing end-user experience and low-latency interactions.

CPU-scheduling Simulator Live | *C++, React, Systems Programming*
- Implemented performance-critical **C++** scheduling logic with a **React** interface, handling edge cases and optimizing resource allocation across 1K+ simulated process combinations.
