Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full stack developer completing an MSCS at USC with 2+ years building enterprise websites and SaaS products using **JavaScript**, **HTML5**, **CSS3**, **SQL**, and **MVC** frameworks. Experienced with **GitHub**, technical documentation, **Docker**, **Linux**, bug troubleshooting, and fast-paced cross-functional delivery for internal and external stakeholders.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Software Engineering, Database Systems

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, OOP, Data Structures, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built and maintained full-stack web platform services with **SQL**-backed schemas and API workflows, authoring technical documentation and validation checks that support **500+ users** and **5K+ monthly jobs** at **99%+ reliability**.
- Diagnosed production website issues, partnered with stakeholders on feasibility and scope, and shipped performance improvements that reduced dashboard latency from **1.2s** to **350ms** through indexed queries and optimized data-fetch patterns.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed full-stack websites using **HTML5**, **CSS3**, **JavaScript**, and **React.js** with Flask **MVC** Blueprint modules, delivering seamless instructor-facing products integrated with **MySQL** and **REST APIs** at **10K+ daily requests**.
- Managed **GitHub** pull requests and code reviews, researched QA-discovered bugs, and authored developer-friendly workflow documentation while reducing manual processing turnaround by **60%** in a fast-paced Agile environment.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Troubleshot, diagnosed, and resolved production defects across **Linux**, Windows, and macOS web-adjacent services, communicating fixes clearly while maintaining **GitHub** repositories, organized branches, and **20+ automated test suites**.
- Collaborated with senior engineers on peer reviews and technical planning, documenting API structures and CI/CD workflows in Jenkins that improved pipeline efficiency by **68%** and API response times by **30%**.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built and deployed enterprise business websites with **React.js**, **Node.js**, and **SQL** across an **MVC microservices** CRM platform, containerizing releases with **Docker** and **Docker Compose** through Jenkins pipelines syncing **2M+ records**.
- Supported multiple fast-moving projects with clean **OOP** code and team coding standards, cutting deployment cycles by **50%** while keeping billing and operations sites modern, secure, and optimized for performance.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Developed full-stack websites with **JavaScript**, **HTML5**, **CSS3**, and Flask backends, writing efficient **SQL**-tuned APIs across **50K+ records** and closing client-reported bugs with sub-**200ms** response performance.
- Used **GitHub** version control and collaborative code reviews with senior developers, creating technical documentation for handoffs and improving cross-platform web compatibility by **15%** under shifting priorities.

Skills

Full Stack Web: JavaScript, HTML5, CSS3, SQL, MySQL, PostgreSQL, MVC, OOP, React.js, Node.js, Flask, PHP (familiar), Laravel (familiar), Vue.js (familiar), REST APIs, SaaS, CMS (familiar), performance optimization
DevOps & Team: Git, GitHub, pull requests, code reviews, technical documentation, Docker, Docker Compose, Linux, Jenkins, CI/CD, bug troubleshooting, technical planning, feasibility assessments, Agile, peer programming, fast-paced execution

Projects

CivicPortal | *PHP, Laravel, Vue.js, Docker, Government Web*

- Built a public-sector web portal using **Laravel**-style **MVC** patterns and **Vue.js** components with **Docker** deployment, authoring API and workflow documentation for collaborative handoffs across civic content management features.

HMIS Live | *Full Stack, Enterprise Website, SQL, Documentation*

- Designed and maintained an enterprise healthcare website with appointment workflows, structured **SQL** data models, and developer-readable integration docs, reducing administrative workload by **30%** across **100+ daily** operations.

Chat2SQL Code | *JavaScript, SQL, Docker, GitHub, Linux*

- Developed a full-stack database web tool with optimized **SQL** queries, **Docker Compose** local environments, and **GitHub**-based collaboration workflows supporting maintainable code standards across **Linux**, Windows, and macOS setups.
