Summary

Full-stack Software Engineer pursuing an MSCS at USC with 2+ years building **Java/Spring Boot microservices**, **secure APIs with authentication and RBAC**, and React front-ends across PostgreSQL, Oracle, and NoSQL systems, with AI-assisted development experience.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Software Engineering

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Database Systems, Software Engineering, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built **multi-tenant backend services** with row-level security and access controls for 500+ users on PostgreSQL and Azure SQL, optimizing query patterns to cut request latency from 1.2s to 350ms.
- Designed **secure FastAPI services and APIs** with validation and reconciliation across 5K+ monthly jobs, integrating CI/CD pipelines for reliable, automated production releases at 99%+ reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **full-stack React features and secure backend APIs** (Flask, REST) with Flask-Login authentication, handling 10K+ daily requests behind a switchable provider architecture with CI/CD releases.
- Leveraged **AI-assisted development tools and LLMs** to accelerate prototyping, testing, and refactoring, shipping reliable production features for 150+ users in a fast-paced environment.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Built and maintained **Java microservices and APIs** using OOP design patterns with Mockito-based unit and security testing, improving response times **30%** across distributed enterprise systems.
- Integrated **automated testing into CI/CD pipelines** (Jenkins, PyTest, 20+ suites) aligned with DevSecOps practices, increasing reliability **68%** through version control and dependency management.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Engineered **microservices with JWT authentication and role-based access control (RBAC)** across eight workflows, securing 2M+ records on Azure SQL with React and Node.js full-stack delivery.
- Automated **Docker-based CI/CD deployments** via Jenkins with Sentry and Azure Monitor observability, cutting release time **50%** and improving security and stability across environments.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **Spring Boot and Flask APIs with JWT and wallet-signature authentication**, enabling secure passwordless login and integrating third-party gateways across 50K+ records with sub-200ms responses.
- Implemented **secure access patterns and webhook automation** for payment workflows, reducing manual handling **70%**, and documented API integration architecture for stakeholders.

Skills

Languages: Java, JavaScript/TypeScript, Python, SQL, Bash
Backend & APIs: Spring Boot, Spring Security, Flask, FastAPI, Node.js, REST APIs, Microservices, API Security
Identity & Access: OAuth 2.0, OIDC, JWT, SAML/SSO, RBAC, Authentication/Authorization
Frontend: React.js, Next.js, TypeScript, TailwindCSS, Component-Based UI
Databases: PostgreSQL, Oracle, MySQL, MongoDB, DynamoDB, Azure SQL
Cloud & DevSecOps: AWS (IAM, Lambda, EKS, API Gateway), Docker, Kubernetes, CI/CD, GitHub Actions, Jenkins
AI & Practices: AI-Assisted Development (Copilot), LangChain, Agentic AI, Git/GitHub, Postman, Agile

Projects

FinNexus Live | *Token-Based Security, Kubernetes, MongoDB*
- Built a **secure fintech platform** with a token-based firewall and authentication handling 1M+ transactions for 50K+ users, with Kubernetes-backed CI/CD and real-time updates under high volume.

Chat2SQL Code | *Java, TypeScript, Oracle, PostgreSQL, MongoDB*
- Built a **Java and TypeScript data workspace** supporting 10+ relational and NoSQL databases (Oracle, PostgreSQL, MongoDB), with schema-aware querying and Docker-backed cross-platform deployment.

Big-Brain Live | *Authentication, Access Control, Cloud*
- Built an **AI document platform** with Clerk-based authentication and document-access controls over 50K+ records, enabling secure semantic search and collaboration with sub-second retrieval.
