Summary

Full-stack Software Engineer pursuing an MSCS at USC with 2+ years building and maintaining **Java/Spring backend systems**, **JavaScript front-ends**, and **PostgreSQL/Oracle**-backed applications, including cross-platform mobile development across iOS and Android.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Software Engineering

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Database Systems, Software Engineering, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built and maintained **backend systems and PostgreSQL databases** for 500+ users, troubleshooting and optimizing query patterns and indexing to cut request latency from 1.2s to 350ms in production.
- Customized and expanded **multi-tenant platform features and APIs** as requirements evolved, implementing validation and reconciliation checks across 5K+ monthly jobs for 99%+ reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **full-stack features** with a JavaScript/React front-end and backend APIs handling 10K+ daily requests, maintaining and troubleshooting MySQL and AWS RDS-backed services in production.
- Collaborated with team members to build and ship **customer-facing application features** for 150+ users, reducing turnaround **60%** while reporting progress in a fast-paced environment.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Built and troubleshot **Java-based modules and APIs** using OOP design patterns (Singleton, Factory) with Mockito testing, improving response times **30%** across distributed production systems.
- Maintained and expanded **in-house systems** through CI/CD automation and 20+ test suites, increasing reliability **68%** while collaborating with Microsoft/GitHub stakeholders in Agile sprints.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed **full-stack web applications** (React, Node.js, REST APIs) with microservices and real-time updates across eight workflows, syncing 2M+ records with Azure SQL databases.
- Customized and maintained **CRM platform features** and automated Docker-based deployments via Jenkins, cutting release time **50%** and improving stability across environments.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **cross-platform mobile applications** (React Native, iOS and Android) with Spring Boot and Flask APIs, integrating real-time Firebase sync across 50K+ records with sub-200ms responses.
- Maintained and troubleshot **payment and booking workflows** via webhook automation, reducing manual handling **70%**, and documented architecture for client stakeholders.

Skills

Languages: Java, JavaScript/TypeScript, Python, SQL, HTML/CSS, Bash
Backend & APIs: Java Spring Boot, Spring Framework, Flask, Node.js, Express.js, REST APIs, Microservices
Frontend: Vue.js, React.js, Angular.js, Next.js, TailwindCSS, Component-Based UI
Mobile: React Native, iOS, Android, Cross-Platform Development
Databases: PostgreSQL, Oracle, MySQL, SQL Server, MongoDB, Azure SQL
Cloud, DevOps & Practices: AWS, Azure, Docker, Jenkins, CI/CD, Git, OOP, Troubleshooting, Agile, Unit Testing

Projects

Chat2SQL Code | *Java, TypeScript, Oracle, PostgreSQL*
- Built an **AI-powered SQL workspace** in a **Java** and TypeScript codebase supporting 10+ databases including Oracle, PostgreSQL, and MySQL, with Docker- and Maven-backed cross-platform deployment.

HMIS Live | *MERN, TypeScript, REST APIs*
- Built a **full-stack workflow management system** (MERN, TypeScript) integrating external APIs, appointment workflows, and notifications, reducing administrative workload **30%** through structured schema design.

FinNexus Live | *Next.js, MongoDB, WebSockets*
- Built a **full-stack platform** (Next.js, MongoDB) handling 1M+ transactions for 50K+ users with real-time updates, secure access, and advanced filtering under high transaction volume.
