Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Forward deployed engineer completing an MSCS at USC with 2+ years shipping production **AI agents** in **Python**, **React**, and **TypeScript**. Experienced translating customer requirements into **LLM**-powered workflows, unstructured document processing, and cloud-backed enterprise deployments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Advanced NLP, Analysis of Algorithms, Software Engineering

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, OOP, Data Structures

Experience

USC Dornsife **Los Angeles, CA**
Forward Deployed Engineer *September 2025 – Present*

- Built production **AI agent** orchestration in **Python**/FastAPI for **500+ users**, translating stakeholder workflows into async systems processing **1K+ LLM jobs** with **99%+ reliability** on Azure infrastructure.
- Partnered with customers to refine requirements and deploy validation checks, optimizing agent pipelines that reduced dashboard latency from **1.2s to 350ms** in fast-moving ambiguous environments.

Grad8 **Los Angeles, CA**
Forward Deployed Engineer *June 2025 – August 2025*

- Deployed grading **AI agents** with **Claude**, GPT-4o, and OCR for **150+ customers**, turning unstructured PDF/DOCX submissions into automated flows handling **10K+ daily requests**.
- Shipped **React** and **Python**/Flask solutions on AWS RDS, working directly with users to improve workflows and reduce feedback turnaround by **60%** through production iteration.

USC AD Labs **Los Angeles, CA**
ML Systems Engineer *January 2025 – May 2025*

- Developed **Python** ML pipelines processing **100K+ logs**, productionizing agent-style sequence models and evaluation workflows alongside senior engineers in research-to-production environments.

Aasma Technology Solutions **India**
Software Engineer - (SecureSync) *August 2023 – July 2024*

- Delivered enterprise integrations for Microsoft/GitHub stakeholders, translating requirements into microservices and REST APIs with **20+ test suites** while improving API performance by **30%** on AWS infrastructure.

Aasma Technology Solutions **India**
Software Engineer Intern - (VibrantChem) *May 2023 – August 2023*

- Built enterprise CRM workflows with **React**, Node.js, and Azure SQL syncing **2M+ records**, supporting operations teams with billing automation and maintainable service integrations.

Skills

AI & Agents: Python, LLMs, GPT-4o, Claude, agent architectures, prompt engineering, multimodal AI, OCR, NLP, unstructured documents, workflow automation, FastAPI, Flask, production AI
Stack: React, TypeScript, JavaScript, REST APIs, AWS, Azure, Docker, CI/CD, PostgreSQL, SQL, customer discovery, requirements translation, Git, Agile, ownership, PyTorch (familiar), algorithms

Projects

Big-Brain Live | *LLMs, Document AI, React, TypeScript*

- Shipped a document **AI agent** platform over **50K+ unstructured files** with semantic search, summarization, and Q&A using LLMs and a **React**/TypeScript UI.

HMIS Live | *TypeScript, Workflow Automation, Integrations*

- Automated appointment workflows, consent-based data entry, and API integrations, reducing administrative workload by **30%** for enterprise process automation.

InsureFlow Code | *Python, LLM Agents, Document Processing*

- Prototyped insurance-style **AI teammates** extracting fields from unstructured policy documents and preparing structured entries with human-in-the-loop review.
