Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full stack engineer completing an MSCS at USC with frontend depth in **TypeScript** and **React**, building workflow-driven, client-facing applications integrated with distributed **microservices** and **REST APIs**. Experienced partnering across product and backend teams on usability, performance, and end-to-end feature delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Database Systems, Software Engineering

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, OOP, Data Structures, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Designed and maintained client-facing dashboard interfaces integrated with FastAPI **microservices**, optimizing frontend data-fetch patterns and indexed queries that reduced dashboard latency from **1.2s** to **350ms** for **500+ users**.
- Partnered with stakeholders to translate requirements into scalable API-backed features, participating in code reviews and production troubleshooting while supporting **5K+ monthly jobs** at **99%+ reliability**.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed document-heavy, workflow-driven **React** interfaces for upload, rubric review, and grading history, integrating **TypeScript**-ready component patterns with Flask **REST APIs** serving **10K+ daily requests**.
- Collaborated across frontend and backend teams on API design and modular MVC services, conducting code reviews and automated CI/CD releases that reduced instructor feedback turnaround by **60%**.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Integrated frontend-adjacent services with a **microservice** architecture across distributed systems, collaborating with backend engineers on **REST API** contracts, payload optimization, and cross-platform delivery validated by **20+ test suites**.
- Participated in Agile code reviews and architectural discussions with Microsoft/GitHub partners, troubleshooting production defects and improving API response times by **30%** through pagination and caching enhancements.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built full stack **React.js** interfaces and **REST APIs** across an **8-service microservices** CRM platform with WebSocket-driven updates, supporting workflow-heavy billing, lead, and resource modules syncing **2M+ records**.
- Contributed to end-to-end feature delivery with Jenkins CI/CD and Docker deployments, partnering with senior engineers on usability improvements, automated testing, and release reliability across client-facing operations dashboards.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Developed a **TypeScript**/**React** web dashboard integrated with Flask backend **REST APIs**, delivering client-facing booking and payment workflows across **50K+ records** with sub-**200ms** response performance.
- Supported complex, workflow-driven user experiences across mobile and web clients, using **Git** version control and collaborative code reviews to ship reliable features with real-time Firebase synchronization.

Skills

Frontend: TypeScript, JavaScript, React.js, Next.js, HTML5, CSS3, TailwindCSS, usability, performance optimization, workflow-driven UIs, document-heavy interfaces, client-facing applications
Full Stack: REST APIs, API design, microservices, Flask, Python, Node.js, Scala (familiar), Ruby on Rails (familiar), PostgreSQL, MySQL, SQL, WebSockets, distributed systems, Git, code reviews, architectural discussions, Agile, CI/CD, Docker, product collaboration

Projects

HMIS Live | *TypeScript, React, Workflow UI, Microservices*

- Built a **TypeScript**-backed healthcare platform with appointment, consent, and record-access workflows, integrating distributed APIs and real-time monitoring to reduce administrative workload by **30%** across **100+ daily** operations.

FinNexus Live | *TypeScript, Next.js, Client-Facing Fintech, Microservices*

- Developed a scalable client-facing fintech platform with **TypeScript**, secure bank linking, and real-time transaction filtering across **1M+ records**, demonstrating high-scale frontend patterns for complex financial workflows.

Linguistix | *TypeScript-Ready APIs, Docker, AWS ECS, CI/CD*

- Deployed a containerized API service on **AWS ECS** with CodePipeline CI/CD, supporting frontend integration patterns and consistent microservice releases across development, testing, and production environments.
