Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Cloud-focused Software Engineer pursuing an MSCS at USC with 2+ years building and operating Azure and AWS infrastructure, Infrastructure as Code, containerized deployments, and CI/CD pipelines, with experience in cloud monitoring, security, cost optimization, and performance tuning.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, Software Engineering, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Designed and managed **Azure cloud infrastructure** (Azure SQL, Blob Storage) for 500+ users, optimizing performance, scalability, and queries to cut latency from 1.2s to 350ms.
- Monitored and troubleshot **cloud systems** with validation, reconciliation, and CI/CD releases across 5K+ monthly jobs, maintaining 99%+ availability and reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Deployed and operated **cloud-hosted backend services** (AWS RDS) with GitHub Actions CI/CD for 150+ users, scripting automation in Python for 10K+ daily requests.
- Troubleshot and **optimized cloud application performance** under peak load, remediating issues and reducing turnaround **60%** across environments.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Built **AWS cloud automation** (Glue, S3) with Jenkins CI/CD across three platforms, optimizing storage costs **15%** and improving pipeline efficiency **68%**.
- Implemented **Bash/Python scripting** and automated build and test infrastructure, performing root cause analysis and collaborating with DevOps stakeholders in Agile sprints.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Provisioned **Azure infrastructure with ARM templates (IaC)** and App Services, containerizing eight microservices with Docker and automating Jenkins CI/CD deployments.
- Enforced **cloud security and observability** with Snyk, OWASP, Azure Monitor, and Kibana (ELK), cutting deployment time **50%** with governance and monitoring best practices.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Deployed **cloud-backed real-time infrastructure** (Firebase, AWS) for 50K+ records with sub-200ms latency, integrating secure access and webhook automation.
- Documented **infrastructure architecture and procedures**, collaborating with clients to troubleshoot and resolve issues across cloud environments and applications.

Skills

Cloud Platforms: Microsoft Azure (App Services, Blob, Azure SQL), AWS (EC2, S3, Glue, RDS, ECS), GCP, Hybrid/Multi-Cloud
IaC & Automation: Terraform, ARM Templates, CloudFormation, Ansible, Infrastructure Automation, Bash
Containers & Orchestration: Docker, Kubernetes, Docker Compose, Microservices, Cloud-Native Architecture
CI/CD & DevOps: Jenkins, GitHub Actions, GitLab CI, CI/CD Pipelines, Git, Deployment Automation
Monitoring & Security: CloudWatch, Azure Monitor, Kibana (ELK), Grafana, IAM & Networking, Cloud Security
Languages & Practices: Python, Bash, SQL, Cost Optimization, Performance Tuning, Compliance & Governance

Projects

Linguistix | *AWS (ECS/Fargate, CodePipeline), Docker, CI/CD*
- Deployed a **containerized API on AWS** (ECS/Fargate, CodePipeline) with automated CI/CD, validation, and infrastructure automation at production-grade reliability.

FinNexus Live | *Kubernetes, CI/CD, MongoDB, Firewall*

- Built a **Kubernetes-based cloud platform** with CI/CD pipelines and a token-based firewall, scaling to 50K+ users and 1M+ transactions with secure access.

Big-Brain Live | *GCP, PostgreSQL, REST APIs*

- Deployed a **cloud data platform** on GCP with scalable storage, indexing, and performance tuning that cut retrieval latency **40%**.
