Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Java Software Engineer pursuing an MSCS at USC with 2+ years building Spring Boot microservices, REST APIs, and SQL-backed backend systems using Core Java, concurrency, and design patterns, delivering reusable, modular, scalable components in Agile global delivery environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built **backend services and REST APIs** on SQL Server and PostgreSQL for 500+ users, optimizing queries and indexing to cut latency from 1.2s to 350ms with modular, reusable data-access components.
- Engineered **concurrent async orchestration** with explicit job-state transitions and failure isolation, processing 1K+ jobs and increasing throughput **3x** under concurrent load.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **REST APIs and backend services** handling 10K+ daily requests for 150+ users, applying **multithreading and concurrency** (ThreadPoolExecutor) for fault-tolerant batch processing.
- Shipped production code through **CI/CD pipelines** with code reviews in an Agile workflow, reducing turnaround time **60%** while maintaining stable API performance under peak load.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **Java microservices and REST APIs** using OOP design patterns (Singleton, Factory) with Mockito unit testing, improving response times **30%** through reusable, modular components.
- Drove **ETL and CI/CD automation** (Jenkins, AWS Glue, S3) across an Agile Scrum global delivery model with Microsoft/GitHub stakeholders, boosting pipeline efficiency **68%**.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a **microservice architecture** with eight services for authentication, billing, and notifications (React, Node.js), syncing 2M+ records with JWT-based role access.
- Automated **Docker and Jenkins CI/CD** on Azure with real-time WebSocket updates, cutting deployment time **50%** and improving scalability through modular service design.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **Spring Boot and Flask backend APIs** for a cross-platform application across 50K+ records, integrating secure payment workflows with sub-200ms responses.
- Developed **frontend interfaces** (React, TypeScript, HTML/CSS) with real-time Firebase sync and presented end-to-end system architecture to clients for delivery alignment.

Skills

Languages: Java (Java 8), Python, JavaScript/TypeScript, SQL, C++, Bash
Core Java: OOP, Concurrency & Multithreading, Collections, Design Patterns (Singleton, Factory), Exception Handling
Backend & APIs: Spring Boot, REST APIs, Microservices, FastAPI, Flask, Node.js
Frontend: Angular, React.js, HTML5, CSS3, Bootstrap, TailwindCSS
Databases: Oracle, SQL Server, PostgreSQL, MySQL, MongoDB, Azure SQL
Cloud & Practices: AWS, OpenShift, Docker, Kubernetes, CI/CD (Jenkins), Agile/SDLC, Git

Projects

Chat2SQL Code | *Java, TypeScript, Oracle, Docker, Maven*
- Built an **AI-powered SQL workspace** in a Java and TypeScript codebase supporting 10+ databases (Oracle, SQL Server) with Maven, Docker, and schema-aware query generation.

HMIS Live | *MERN, Microservices, OOP*

- Architected a **microservice-based healthcare platform** (MERN) applying object-oriented design to manage 100+ daily appointment workflows, reducing record retrieval time **2x**.

FinNexus Live | *Next.js, Kubernetes, MongoDB*

- Built a **scalable platform** on Kubernetes for 50K+ users and 1M+ transactions with token-based access, real-time updates, and modular CI/CD deployment.
