Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software analyst with 2+ years validating requirements, executing **functional, regression, integration, and performance testing**, and supporting post-deployment applications. Familiar with **C#/.NET**, **Angular**, **JavaScript**, **SQL Server**, **Azure**, and **CI/CD** in collaborative client-facing environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Software Engineering, Database Systems, Web Technologies, Computer Networks

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Object-Oriented Programming, Data Structures, Computer Networks

Experience

USC Dornsife **Los Angeles, CA**
Software Analyst *September 2025 – Present*
- Validated data workflows and reconciliation checks for 500+ users across **Azure SQL** and cloud services, supporting post-deployment reliability for **5K+ monthly** jobs while documenting test outcomes and enhancement recommendations.
- Performed integration and performance analysis that reduced dashboard latency from **1.2s to 350ms**, partnering with team members to identify user-need enhancements and implement CI/CD-backed releases with **99%+ reliability**.

Grad8 **Los Angeles, CA**
Software Analyst Intern *June 2025 – August 2025*
- Designed test strategies for customer-facing web application flows handling **10K+ daily requests**, executing usability and regression validation while troubleshooting defects and reducing manual turnaround by **60%** through clear stakeholder communication.
- Supported post-deployment application enhancements with automated validation and GitHub Actions pipelines, collaborating with product partners to confirm requirements and verify fixes in a fast-paced team environment.

Aasma Technology Solutions **India**
Software Analyst - (SecureSync) *August 2023 – July 2024*
- Validated project requirements and enhancements across cross-platform integrations, maintaining **20+ automated test suites** for **functional, regression, and integration testing** that increased release confidence by **68%** in Jenkins CI/CD pipelines.
- Applied and verified bug fixes across Windows and Linux environments, tracked defect resolution, and communicated test results to stakeholders while collaborating in Agile Scrum with business and engineering partners.

Aasma Technology Solutions **India**
Software Analyst Intern - (VibrantChem) *May 2023 – August 2023*
- Tested and troubleshot **real-time** operational dashboards syncing **2M+ records** via REST APIs and WebSockets, validating functionality across billing, resource, and reporting modules used by distributed client teams.
- Implemented **Docker/Jenkins** deployment pipelines cutting release cycles by **50%**, researching CI/CD improvements while supporting **Azure SQL**-backed applications post deployment with strong analytical problem-solving skills.

MedDevice Test Systems **India**
Software Analyst Intern *January 2023 – April 2023*
- Validated connected-device software scenarios with deterministic simulators and automated test libraries, identifying defects, reporting bugs, and tracking resolution progress across hardware-software integrated system workflows.
- Integrated standardized test coverage reports into CI pipelines, supporting clients and engineering partners with troubleshooting documentation and timely communication during post-deployment validation cycles.

Skills

Testing & Analysis: functional testing, regression testing, integration testing, performance testing, usability testing, requirements validation, defect tracking, troubleshooting, test planning, client communication, problem solving
Microsoft & Web: **C#**, **.NET**, **SQL Server**, **Azure**, Visual Studio (familiar), VSCode, **Angular**, JavaScript, HTML5, CSS3, Bootstrap, MVC, REST APIs, jQuery (familiar), Kendo UI (familiar), React, Vue (familiar), MongoDB, Cosmos DB (familiar)
DevOps & Cloud: **Git**, TFVC (familiar), Docker, CI/CD, DevOps, Jenkins, GitHub Actions, AWS, GCP (familiar), C++, Go (familiar), relational database design, self-starter, customer service

Projects

HMIS Live | *Full Stack, SQL, REST APIs, Responsive UI*
- Built full-stack operations software with **TypeScript**, responsive UI, **REST APIs**, and structured relational schemas, demonstrating MVC-style module design, usability testing, and deployment support for client-facing operational workflows.

Chat2SQL Code | *SQL Server, PostgreSQL, Docker, Git*
- Developed database management tooling with **SQL Server** and PostgreSQL integrations, **Docker** deployment pipelines, and **Git** version control, supporting schema validation, query testing, and multi-database enterprise application workflows.

FinNexus Live | *Angular-style TypeScript, MongoDB, Real-Time Systems*
- Shipped a scalable web platform with real-time updates, secure APIs, and advanced filtering across **1M+ transactions**, performing integration and performance validation for high-volume operational systems requiring reliable client-facing behavior.
