Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer completing an MSCS at USC with 2+ years building **Python** backend services, **REST APIs**, and responsive **React/TypeScript** interfaces. Experienced with **PostgreSQL**, **pytest**, **Docker**, **Git**, CI/CD, and collaborative Agile development on **Linux** environments.

Education

University of Southern California, Los Angeles, CA — **August 2024 – May 2026**
Master of Science in Computer Science — *GPA: 3.75/4.0*
Coursework: Software Engineering, Database Systems, Computer Networks

Pandit Deendayal Energy University, Gandhinagar, India — **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering — *GPA: 3.88/4.0*
Coursework: Software Engineering, OOP, Data Structures, Operating Systems

Experience

USC Dornsife — **Los Angeles, CA**
Software Engineer — *September 2025 – Present*

- Developed maintainable **Python**/FastAPI backend services and **REST APIs** with **PostgreSQL** schemas, query optimization, and validation workflows supporting **500+ users** and **5K+ monthly jobs** at **99%+ reliability**.
- Implemented **pytest**-style validation pipelines and CI/CD releases, collaborating in daily standups and code reviews while troubleshooting production issues across **Linux**-hosted cloud environments.

Grad8 — **Los Angeles, CA**
Software Engineer Intern — *June 2025 – August 2025*

- Built responsive web interfaces with **HTML**, **CSS**, **JavaScript**, and **React.js** backed by **Python**/Flask **REST APIs** on **MySQL**/AWS RDS, serving **10K+ daily requests** for instructor-facing application logic.
- Wrote unit and integration tests with automated CI/CD on GitHub Actions, participating in code reviews and reducing manual turnaround by **60%** while partnering with senior developers on feature design.

Aasma Technology Solutions — **India**
Software Developer Engineer - (SecureSync) — *August 2023 – July 2024*

- Engineered **Python** backend modules and **REST APIs** with **20+ PyTest** suites in Jenkins CI/CD, improving response times by **30%** through clean OOP refactoring across **Linux**, Windows, and macOS environments.
- Collaborated in Agile Scrum standups with senior engineers and GitHub stakeholders, using **Git** workflows to implement automation routines, troubleshoot defects, and maintain reliable deployment pipelines.

Aasma Technology Solutions — **India**
Full Stack Developer Intern - (VibrantChem) — *May 2023 – August 2023*

- Containerized applications with **Docker** and **Docker Compose** through Jenkins pipelines, supporting **React.js** and Node.js services syncing **2M+ records** with optimized **SQL** schemas on Azure SQL.
- Automated deployment and configuration workflows while performing basic **Linux** server troubleshooting, cutting release cycles by **50%** and supporting backend functionality across billing and operations modules.

LST Capitals — **India**
Web Developer Intern — *November 2022 – January 2023*

- Developed **Python**/Flask **REST APIs** and web application logic with structured JSON responses across **50K+ records**, delivering sub-**200ms** performance through query tuning and maintainable service modules.
- Supported front-end integration with **JavaScript** clients and Firebase-backed workflows, using **Git** version control and collaborative reviews to ship reliable features under tight deadlines.

Skills

Backend & Web: Python, REST APIs, FastAPI, Flask, React.js, TypeScript, JavaScript, HTML5, CSS3, Node.js, Vue.js (familiar), Angular (familiar), automation workflows, clean code, code reviews
Data & DevOps: PostgreSQL, MySQL, SQLite, SQL, schema design, query optimization, Git, pytest, PyTest, Jest (familiar), Docker, Docker Compose, Ansible (familiar), Linux, CI/CD, Jenkins, GitHub Actions, GitLab CI (familiar), AWS, Azure, GCP (familiar), Agile

Projects

Linguistix | *Python, Docker, AWS ECS, CI/CD, REST APIs*

- Deployed a containerized **Python** API on **AWS ECS** with CodePipeline CI/CD, validation checks, and consistent images across development, testing, and production environments.

HMIS Live | *TypeScript, React, REST APIs, PostgreSQL-Style Data*

- Built responsive web components and backend integrations with **TypeScript**, appointment workflows, and structured relational data models, reducing administrative workload by **30%**.

Chat2SQL Code | *Python/Java Backend, SQL, Docker, Git*

- Developed database tooling supporting **PostgreSQL**, **MySQL**, and **SQLite** with optimized queries, **Docker** deployment, and **Git**-based collaborative development workflows.
