Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer pursuing an MSCS at USC with 2+ years building **Java backend services**, **secure scalable APIs**, and payment and transaction systems, with strong testing, Agile, and enterprise software-development fundamentals.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Software Engineering, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Database Systems, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **secure, scalable backend services** with row-level security and access controls for 500+ users on PostgreSQL, optimizing queries to cut latency from 1.2s to 350ms under enterprise standards.
- Implemented **automated validation and reconciliation** across 5K+ monthly jobs with CI/CD pipelines, supporting troubleshooting, defect resolution, and 99%+ production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **backend services and APIs** handling 10K+ daily requests with automated unit and integration tests, participating in code reviews and CI/CD releases for reliable production delivery.
- Collaborated within an **Agile team** to ship features for 150+ users, troubleshooting defects and incorporating feedback while reducing turnaround **60%** in a fast-paced environment.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Built and maintained **Java microservices and APIs** with OOP design patterns and Mockito-based unit testing, improving response times **30%** across distributed enterprise systems under security standards.
- Created and executed **20+ automated test suites** integrated into CI/CD pipelines (Jenkins, PyTest), increasing reliability **68%** through code reviews, version control, and Agile sprints with stakeholders.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Engineered **secure microservices** with JWT authentication and role-based access control across eight workflows, protecting 2M+ records on Azure SQL with React and Node.js full-stack delivery.
- Automated **Docker-based deployments** via Jenkins with monitoring and defect tracking, cutting release time **50%** and improving stability and compliance across environments.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **Spring Boot and Flask payment APIs** with secure JWT authentication and webhook automation across 50K+ transaction records, integrating third-party gateways with sub-200ms responses.
- Implemented **secure transaction and refund workflows** with idempotent processing, reducing manual handling **70%**, and documented integration architecture for compliance and stakeholder alignment.

Skills

Languages: Java, Python, JavaScript/TypeScript, SQL, C++, Bash
Backend & APIs: Java Spring Boot, Flask, FastAPI, Node.js, REST APIs, Microservices, API Security
Security & Standards: Authentication, RBAC, Encryption, Secure Coding, Compliance, Audit
Databases: PostgreSQL, Oracle, MySQL, SQL Server, MongoDB, Azure SQL
Testing & Quality: Unit Testing, Integration Testing, PyTest, Mockito, Code Reviews, Automated Testing
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD, Jenkins, Git/GitHub, Agile

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Built an **AI-powered SQL workspace** in a Java and TypeScript codebase supporting 10+ databases, with schema-aware querying and Docker- and Maven-backed cross-platform deployment.

FinNexus Live | *Payments, Token Security, Kubernetes*

- Built a **secure payments platform** handling 1M+ transactions for 50K+ users with a token-based firewall, real-time updates, and Kubernetes-backed CI/CD under high transaction volume.

HMIS Live | *Full-Stack, OOP Workflows, REST APIs*

- Built a **full-stack workflow management system** applying object-oriented business logic and external API integrations, reducing administrative workload **30%** through structured schema design.
