Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with 2+ years building **customer-facing** applications, **Azure**-hosted data services, and **SQL**-driven reporting workflows. Strong in algorithms, **unit testing**, and Agile delivery for regulated financial and analytics platforms requiring technical excellence and continuous learning.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Analysis of Algorithms, Database Systems, Software Engineering, Computer Networks

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Data Structures, Object-Oriented Programming, Software Engineering, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built **Azure SQL** and cloud-backed services supporting 500+ users with normalized schemas, validation, and reporting workflows across **5K+ monthly** jobs, reducing dashboard latency from **1.2s to 350ms** for customer-facing analytics experiences.
- Delivered production releases with automated integration testing and **CI/CD**, achieving **99%+ reliability** while collaborating in Agile sprints with engineers, QA, and product partners on changing requirements and documented deliverables.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **customer-facing React** application flows and **Python** services handling **10K+ daily requests**, writing automated tests and reducing manual processing by **60%** through iterative Agile delivery with cross-functional teammates.
- Partnered on requirements, defect triage, and release readiness across multiple delivery phases, communicating technical information clearly while adapting to evolving product ideas and solutions in a fast-paced startup environment.

USC AD Labs **Los Angeles, CA**
Software Engineering Assistant *January 2025 – May 2025*
- Implemented data processing and evaluation pipelines across **100K+ records**, applying **data structures and algorithms** to improve model-driven analysis, reproducible testing, and reporting outputs for complex quantitative research workflows.
- Contributed technical analysis and documentation while collaborating with researchers and engineers, adapting solutions as requirements evolved and supporting structured delivery of production-oriented modeling and validation improvements.

Aasma Technology Solutions **India**
Software Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **Java** microservices and **Python** ETL flows with **SQL** backends, improving API response by **30%** while maintaining **20+ unit and integration test suites** in Jenkins CI pipelines across Windows and Linux environments.
- Collaborated in Agile Scrum with Microsoft/GitHub stakeholders, organizing self-directed work across multiple work-streams while embracing code reviews, automated testing, and continuous improvement for business-critical enterprise software.

Aasma Technology Solutions **India**
Software Engineer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **Azure SQL**-backed reporting and operations modules across billing, resource allocation, and analytics dashboards syncing **2M+ records**, supporting business planning workflows with real-time updates and structured relational data models.
- Automated Docker/Jenkins deployment pipelines cutting release cycles by **50%**, contributing unit-tested features and clear technical documentation while supporting customer-facing operational tools across distributed services teams.

Skills

Languages: **Python**, **Java**, C# (familiar), JavaScript, TypeScript, SQL, Bash, OOP, data structures, algorithms
Cloud & Data: **Microsoft Azure**, Azure SQL, PostgreSQL, SQL Server, cloud computing, ETL, reporting workflows, financial data (familiar), actuarial modeling (familiar), large-scale calculations (familiar)
Engineering: customer-facing applications, **unit testing**, PyTest, JUnit, Mockito, TDD (familiar), Agile, Scrum, CI/CD, Git, Jenkins, Docker, technical communication, continuous learning, pair programming (familiar), code reviews, self-directed delivery

Projects

FinNexus Live | *Financial Reporting, SQL, Customer-Facing Analytics*
- Built a customer-facing fintech platform supporting **50K+ users** and **1M+ transactions** with real-time reporting, advanced filtering, and secure financial data visibility across high-volume operational workflows requiring accuracy and reliability.

Chat2SQL Code | *Java, SQL Server, PostgreSQL, Docker*
- Developed **Java** services with **SQL Server** and PostgreSQL integrations plus automated validation, supporting schema-aware query workflows and multi-database reporting tooling aligned with enterprise financial and analytics software patterns.

CPU Scheduling Simulator Live | *C++, Algorithms, Performance Analysis*
- Implemented scheduling **algorithms** in **C++** with correctness testing across **1K+** scenarios, applying data-structure and performance-analysis techniques that reduced average turnaround time by **25%** in simulation workloads.
