Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer completing an MSCS at USC with 2+ years building web platform services in **Node.js** and **TypeScript**, **CI/CD** automation, and cloud infrastructure supporting high-reliability production systems. Experienced with **Docker**, **Kubernetes**, **Git**, and platform tooling that improves developer velocity, observability, and scalable delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Computer Networks, Software Engineering, Database Systems

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Operating Systems, Data Structures, Software Engineering, OOP

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Maintained cloud-hosted platform services and **CI/CD**-backed release workflows processing **5K+ monthly jobs** at **99%+ reliability**, optimizing indexed queries and async orchestration that reduced dashboard latency from **1.2s** to **350ms**.
- Assisted production troubleshooting across Azure and PostgreSQL environments, writing automation for validation and reconciliation checks while participating in code reviews and continuous improvement of platform reliability and performance.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built and maintained **TypeScript**-ready **React** services integrated with Flask APIs, implementing **GitHub Actions CI/CD** pipelines and automated test coverage that reduced manual release turnaround by **60%** across instructor-facing web applications.
- Contributed across the full SDLC from requirements to deployment, collaborating with senior engineers on API contracts, logging, and performance tuning while supporting **10K+ daily requests** in production web environments.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Helped build and maintain **Jenkins CI/CD** pipelines with nightly automation scripts, parallel cross-platform builds, and **20+ PyTest** suites that improved pipeline efficiency by **68%** across Windows, Linux, and macOS platform services.
- Participated in production incident troubleshooting and Agile code reviews with Microsoft/GitHub partners, optimizing distributed **REST APIs** and ETL workflows that improved response times by **30%** and reduced technical debt by **20%**.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed core **Node.js** and **React.js** platform modules across an **8-service microservices** architecture, packaging releases with **Docker** and **Jenkins CI/CD** automation that cut deployment cycles by **50%** across billing and operations systems.
- Wrote automation replacing manual staging steps in Jenkins pipelines, achieving **95%+** successful build validation while supporting scalable web fundamentals, API integrations, and real-time updates across **2M+ records**.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built web platform APIs and client integrations with **JavaScript**, Flask services, and Firebase synchronization, delivering sub-**200ms** performance across **50K+ records** and supporting reliable data movement across internet-facing application workflows.
- Used **Git** version control and collaborative code reviews to ship maintainable platform features, assisting troubleshooting efforts and automation improvements that improved cross-platform compatibility by **15%** under tight deadlines.

Skills

Platform & Languages: Node.js, TypeScript, JavaScript, React.js, Vue.js (familiar), web fundamentals, REST APIs, platform services, automation scripts, full SDLC, code reviews, observability, reliability, scalability, performance
Infra & DevOps: CI/CD, Git, GitHub Actions, Jenkins, Docker, Kubernetes, Terraform (familiar), IaC, AWS, Azure, GCP (familiar), edge computing, Cloudflare Workers (familiar), Fastly Compute@Edge (familiar), Linux, microservices, security, Agile

Projects

Linguistix | *Node.js-Ready APIs, Docker, AWS ECS, CI/CD*

- Deployed containerized platform services on **AWS ECS** with CodePipeline **CI/CD**, validation gates, and consistent release automation across development, testing, and production environments supporting reliable developer workflows.

FinNexus Live | *TypeScript, Kubernetes, CI/CD, High-Scale Web*

- Built a scalable web platform with **Kubernetes** deployments and **CI/CD** automation, supporting **1M+ transactions** and real-time updates with performance patterns relevant to high-traffic, client-facing digital products.

HMIS Live | *TypeScript, Sentry, Platform Observability, Web Services*

- Implemented **TypeScript**-backed web services with **Sentry** monitoring and automated workflow tooling, improving operational observability and reducing administrative workload by **30%** across **100+ daily** platform interactions.
