Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software developer with 2+ years building **AWS** cloud solutions, **SQL**-backed integrations, and configurable application modules across the full SDLC. Strong in query optimization, unit testing, Agile delivery, and **generative AI** tooling to translate business requirements into scalable, maintainable production software.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Software Engineering, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Object-Oriented Programming, Data Structures, Computer Networks

Experience

USC Dornsife **Los Angeles, CA**
Software Developer *September 2025 – Present*
- Translated business requirements into cloud data solutions on **Azure SQL** and storage services, applying **query optimization**, indexing, and **performance tuning** that reduced dashboard latency from **1.2s to 350ms** for 500+ users.
- Built integration pipelines and reusable FastAPI modules processing **5K+ monthly jobs** with reconciliation checks, unit-tested releases, and CI/CD deployment from kickoff through production, achieving **99%+ reliability** across multi-system workflows.

Grad8 **Los Angeles, CA**
Software Developer Intern *June 2025 – August 2025*
- Developed full-stack grading solutions on **AWS RDS** and REST APIs serving **150+ instructors** and **10K+ daily requests**, partnering with stakeholders to refine backlog items and deliver defect-free features through rigorous unit testing and debugging.
- Configured modular Flask and React components with GitHub Actions CI/CD pipelines, reducing feedback turnaround by **60%** while collaborating in daily standups and sprint planning to ship scalable, maintainable application enhancements on schedule.

Aasma Technology Solutions **India**
Software Developer - (SecureSync) *August 2023 – July 2024*
- Engineered cross-platform integrations and reusable OOP modules on **AWS Glue** and **S3**, improving API response times by **30%** and ETL pipeline efficiency by **68%** while maintaining **20+ unit and integration test suites** in Jenkins CI/CD.
- Partnered with architects and business stakeholders in Agile Scrum to assess multi-system requirements, propose technical solutions, and support the full SDLC from initial kickoff through production deployment and post-release debugging.

Aasma Technology Solutions **India**
Software Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built scalable microservice integrations with REST APIs and WebSockets syncing **2M+ records**, optimizing **Azure SQL** schemas and API performance for maintainable CRM modules across authentication, billing, and lead-management workflows.
- Automated Docker and Jenkins deployment pipelines cutting release cycles by **50%**, conducting unit and integration testing while aligning delivery with infrastructure and security strategies in a fast-paced development environment.

LST Capitals **India**
Software Developer Intern *November 2022 – January 2023*
- Designed end-to-end booking and payment integrations across Flask APIs, Firebase, and **AWS**-hosted services for **50K+ records**, presenting architecture to business stakeholders and delivering sub-**200ms** API performance through optimization and debugging.
- Implemented webhook-driven payment modules and coupon validation logic with automated unit testing, streamlining cross-platform delivery by **22%** while troubleshooting complex multi-system issues independently under tight deadlines.

Skills

Cloud & AWS: AWS (EC2, S3, RDS, Glue, ECS, CodePipeline), Azure, Docker, Kubernetes (familiar), CI/CD, DevOps, infrastructure integrations, Unqork (familiar), SaaS platform development
Languages & Data: Python, Java, JavaScript, TypeScript, SQL, C++, query optimization, performance tuning, report development, PostgreSQL, SQL Server, MySQL, MongoDB, indexing, relational database design
Engineering: REST APIs, microservices, unit testing, debugging, Agile, Scrum, SAFe PI planning (familiar), reusable components, modular architecture, scalability, maintainability, Git, Jenkins, GitHub Actions, generative AI, LLMs, problem solving, communication

Projects

Linguistix | *AWS, Docker, ECS/Fargate, CI/CD, REST APIs*
- Deployed a containerized data-processing API on **AWS CodePipeline** and **ECS/Fargate** with automated CI/CD releases, validation checks, and service integrations, delivering production-grade reliability and scalable cloud-native modules for enterprise endpoints.

Chat2SQL Code | *SQL Server, PostgreSQL, Java, Docker, Query Optimization*
- Built an AI-assisted database management workspace supporting **10+ SQL engines** with schema-aware query generation, **SQL optimization**, Docker deployment, and reusable Java/TypeScript modules for report development and multi-database integrations.

HMIS Live | *TypeScript, REST APIs, Integrations, Scalable Modules*
- Configured a healthcare operations platform with consent-based API integrations, appointment workflows, and modular dashboards, reducing administrative workload by **30%** through optimized data access patterns and maintainable full-stack component design.
