Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack Software Engineer pursuing an MSCS at USC with 2+ years building data-driven applications in React, TypeScript, Python, and SQL, designing REST APIs and integrations that connect machine-learning outputs and enterprise data to intuitive user experiences.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Developed **full-stack features with FastAPI, SQL, and React**-based dashboards for 500+ users, building data integrations and backend services that cut latency from 1.2s to 350ms.
- Designed **REST APIs and async ML orchestration** connecting model outputs to user-facing applications, processing 5K+ monthly jobs with CI/CD-backed releases at 99%+ reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Built a **React and TypeScript dashboard** with Flask REST APIs translating machine-learning and analytics outputs into data-driven user experiences for 150+ users.
- Delivered **prototypes and production-ready features** with unit testing, reusable components, and documentation, enabling rapid validation and reducing turnaround **60%**.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Collaborated with **data scientists** to connect machine-learning outputs to applications, building data pipelines over 100K+ records and integrating model signals into downstream features.
- Improved model-driven planning accuracy **18%**, surfacing data patterns and edge cases to translate analytical insights into actionable, measurable results.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed **full-stack MERN features and REST APIs** across eight services syncing 2M+ records, building reusable components and analytics dashboards with role-based access.
- Automated **CI/CD (Docker, Jenkins)** on Azure with testing and monitoring, cutting deployment time **50%** and improving consistency across shared services.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **React, React Native, and TypeScript** clients with Flask APIs for a financial booking and payment platform across 50K+ records, delivering sub-200ms responses.
- Integrated **data integrations and webhook APIs** with real-time Firebase sync, documenting architecture and reducing manual handling **70%**.

Skills

Languages: TypeScript, JavaScript, Python, SQL, Java, C++
Frontend: React.js, Next.js, TypeScript, TailwindCSS, Component Libraries, HTML/CSS
Backend & APIs: FastAPI, Flask, Node.js, REST APIs, Microservices, Data Integrations
Databases & Data: PostgreSQL, SQL Server, MySQL, MongoDB, SQL (Joins, Aggregations, Subqueries), ETL
ML & Analytics: ML Output Integration, PyTorch, Data-Driven Applications, Streamlit, Analytics Dashboards
Cloud & Practices: AWS, Azure, GCP, Docker, CI/CD, Git, Testing, Figma, Documentation

Projects

FinNexus Live | *Next.js, TypeScript, MongoDB, WebSockets*
- Built a **data-driven fintech platform** (Next.js, TypeScript) for 50K+ users and 1M+ transactions with real-time analytics, transaction filtering, and token-based access.

Big-Brain Live | *GCP, FAISS, React, REST APIs*

- Built an **AI data platform** on GCP with semantic search over 50K+ records, connecting ML embeddings to a responsive React UI with real-time collaboration.

HMIS Live | *MERN, TypeScript, Sentry*

- Built a **full-stack dashboard** (MERN, TypeScript) with reusable components, consent-based access, and Sentry monitoring, reducing administrative workload **30%**.
