Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer completing an MSCS at USC with 2+ years building scalable enterprise applications across **Java/Spring Boot**, **Python**, **Node.js**, and **React**. Experienced with **PostgreSQL**, **MySQL**, **MongoDB**, **AWS**, **Azure**, **Docker**, **Git**, **JIRA**, and Agile DevOps delivery for cross-functional client-facing solutions.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Database Systems, Software Engineering, Computer Networks

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, OOP, Data Structures, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built scalable back-end services on **Azure** with **PostgreSQL** schemas, query optimization, and **Python**/FastAPI APIs, supporting **500+ users** and **5K+ monthly jobs** through design reviews and **CI/CD**-backed releases at **99%+ reliability**.
- Collaborated with cross-functional stakeholders to define requirements and present technical solutions, documenting workflows and troubleshooting production issues while applying test-driven validation and continuous integration practices across open-source tooling.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed back-end and web applications with **Python**/Flask and **React.js**, integrating **MySQL/AWS RDS** data models and **REST APIs** that served **10K+ daily requests** for enterprise-style instructor workflows with automated test coverage.
- Implemented **GitHub Actions** continuous integration and Agile delivery practices, partnering with senior engineers on code reviews and solution design while reducing manual processing turnaround by **60%** across full-stack feature releases.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered back-end modules and microservices on **AWS** with **AWS Glue**, S3, and SQL data pipelines, using **Docker**-ready deployment workflows, **Git**, and **20+ PyTest** suites within Agile Scrum and **JIRA**-style sprint tracking.
- Presented technical tradeoffs during design reviews with Microsoft/GitHub partners, improving API response times by **30%** and pipeline efficiency by **68%** while maintaining developer-friendly documentation for cross-team handoffs and client engagement support.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built enterprise CRM applications with **JavaScript**, **Node.js**, **React.js**, and **MongoDB**-backed services on **Azure SQL**, packaging releases through **Docker** and Jenkins **DevOps** pipelines syncing **2M+ records** across distributed modules.
- Coordinated project activities across authentication, billing, and operations teams, applying open-source frameworks and coding standards while cutting deployment cycles by **50%** through automated build validation and test-driven release workflows.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Developed back-end services with **Java/Spring Boot** APIs and **Python**/Flask modules integrated with **JavaScript** clients, optimizing **PostgreSQL**-style and Firebase-backed relational workflows across **50K+ records** with sub-**200ms** performance.
- Used **Git** version control and collaborative code reviews to ship scalable web solutions, authoring technical documentation and supporting troubleshooting for internal stakeholders while improving cross-platform compatibility by **15%**.

Skills

Languages & Frameworks: Java, Spring framework, Spring Boot, Jersey (familiar), Python, JavaScript, Node.js, React.js, Angular (familiar), open source technologies, REST APIs, backend development, MVC, OOP
Data & Cloud: PostgreSQL, MySQL, MongoDB, Elasticsearch (familiar), Cassandra (familiar), Couchbase (familiar), SQL, AWS, Azure, Docker, Gradle (familiar), Git, JIRA, Agile, DevOps, CI/CD, Jenkins, Linux, test-driven development, design review

Projects

Chat2SQL Code | *Java, PostgreSQL, MySQL, MongoDB, Docker*

- Extended a **Java** and **TypeScript** database workspace supporting **PostgreSQL**, **MySQL**, and **MongoDB** with **Docker**, Maven, and **Node.js** tooling for cross-platform enterprise SQL development and schema-aware query workflows.

FinNexus Live | *JavaScript, MongoDB, AWS-Style Deployment, CI/CD*

- Crafted a scalable fintech application with **MongoDB** persistence, **JavaScript**/TypeScript services, and containerized **CI/CD** automation supporting **1M+ transactions** and secure API integrations for high-volume client-facing workloads.

Linguistix | *Python, AWS ECS, Docker, Git, DevOps*

- Deployed cloud-native services on **AWS ECS** with CodePipeline **CI/CD**, **Docker** images, and **Git**-managed releases, building automation that improved developer velocity and maintained consistent environments across testing and production.
