Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Mobile and full-stack engineer pursuing an MSCS at USC with 2+ years building **cross-platform mobile apps (React Native)**, React/TypeScript front-ends, and Python/Java backends, with fintech and AI-integration experience; expanding into **native Android (Kotlin/Compose)**.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Software Engineering

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Database Systems, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built **scalable backend APIs and services** (Python, FastAPI, SQL) for 500+ users powering client applications, optimizing queries to cut latency from 1.2s to 350ms for responsive experiences.
- Integrated **AI orchestration and async workflows** with explicit job-state handling across 5K+ monthly jobs, enabling intelligent, automated features at 99%+ reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Built **full-stack features** with React, TypeScript, and backend APIs handling 10K+ daily requests, integrating AI and LLMs into product workflows for 150+ users.
- Applied **AI code-generation tools** (Cursor, Claude) and automated testing to accelerate delivery and code reviews while shipping reliable features in a fast-paced environment.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Built **Java modules and APIs** using OOP design patterns (Singleton, Factory) with Mockito testing, improving response times **30%** and applying clean architecture across production systems.
- Maintained **CI/CD pipelines and 20+ test suites** (Jenkins, PyTest, Gradle-style builds), increasing reliability **68%** through code reviews and engineering standards in Agile sprints.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed **full-stack applications** (React, Node.js) with real-time WebSocket updates and reactive state across eight workflows, syncing 2M+ records with responsive UIs.
- Automated **Docker-based deployments** and monitoring via Jenkins, cutting release time **50%** and improving stability for high-volume user-facing systems.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Launched a **cross-platform mobile app** (React Native, iOS and Android) reaching 50K+ users, building real-time booking, payments, and Firebase sync with sub-200ms API responses.
- Built **Spring Boot and Flask backend APIs** and secure payment workflows for the mobile app, reducing manual handling **70%** while applying mobile design patterns and reactive updates.

Skills

Languages: Java, Kotlin, JavaScript/TypeScript, Python, SQL, Bash
Mobile & Android: React Native, Android, iOS, Jetpack Compose, MVVM, Coroutines, Cross-Platform Development
Frontend & Backend: React.js, Next.js, Flask, FastAPI, Node.js, REST APIs, OpenAPI
Databases: PostgreSQL, MySQL, MongoDB, SQL Server, Firebase, Azure SQL
Cloud & Tooling: AWS, Docker, Gradle, CI/CD, Google Play Console, Git/GitHub, Jenkins
AI & Practices: AI Integration (LLMs), AI Code Gen (Cursor), Code Reviews, Automated Testing, Agile, Fintech

Projects

FinNexus Live | *Fintech, Next.js, MongoDB, Plaid*
- Built a **fintech spend-tracking platform** handling 1M+ transactions for 50K+ users with real-time updates, secure access, and advanced filtering, aligned with finance-automation product workflows.

PiXMod Live | *Next.js, Stripe, MongoDB*
- Built an **AI-powered SaaS app** with Stripe billing and a polished, responsive UI, improving premium conversion **18%** through intuitive, mobile-friendly design patterns.

HMIS Live | *TypeScript, REST APIs, Mobile-Friendly*
- Built a **full-stack mobile-friendly application** (TypeScript) with appointment workflows, notifications, and external API integrations, reducing administrative workload **30%**.
