Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer pursuing an MSCS at USC with 2+ years building secure production systems across Linux, macOS, and Windows. Strong in Python/Java, IAM patterns, Kubernetes/Docker, CI/CD, and AI-first engineering for enterprise security.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Computer Networks, Database Systems, Software Engineering

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Operating Systems, Computer Networks

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer - Identity & Platform *September 2025 – Present*

- Built multi-tenant services with row-level security and access enforcement on Azure SQL for **500+ users**, using AI-first development while reviewing generated code for security and correctness.
- Shipped Python/FastAPI microservices with CI/CD processing **5K+ monthly jobs** at **99%+ reliability**, triaging failures and remediating distributed integration issues with cross-functional partners in Agile sprints.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Implemented Flask-Login authentication and role-aware APIs serving **150+ instructors** with input validation and secrets-aware configuration across **10K+ daily requests** in production.
- Deployed services with GitHub Actions CI/CD and test gates, evaluating human and AI-generated code for security, performance, and maintainability before release.

Aasma Technology Solutions **India**
Software Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered cross-platform software on **Linux**, **macOS**, and **Windows** with microservices, REST APIs, and Jenkins CI/CD, maintaining **20+ test suites** across distributed production environments.
- Improved secure API delivery with PyTest-validated releases, collaborating with Microsoft/GitHub stakeholders to close quality gaps and reduce technical debt by **20%**.

Aasma Technology Solutions **India**
Software Engineer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed JWT authentication and RBAC microservices across eight services with secure transport and permission enforcement for workflows syncing **2M+ records**.
- Deployed Docker workloads with OWASP Dependency-Check and Snyk scanning, supporting vulnerability triage, remediation validation, and observability via Azure Monitor in CI/CD pipelines.

Cyber Security and Data Mining **India**
Security Engineering Fellow *May 2023 – August 2023*

- Built threat detection pipelines over **650K+ URLs** using Python and ML models achieving **96%+ accuracy**, analyzing phishing and malware patterns with secure development practices.

Skills

IAM & Security: Python, Java, Golang (familiar), Linux, macOS, Windows, JWT, OAuth (familiar), SAML (familiar), MFA (familiar), TLS (familiar), PKI (familiar), RBAC, OWASP, secure coding, vulnerability remediation, input validation, Zero Trust (familiar), device trust (familiar)
Platform & AI: Kubernetes, Docker, Terraform (familiar), microservices, distributed systems, REST/JSON, CI/CD, Git, PyTest, observability, logging, SQL, PostgreSQL, MongoDB, AI-first engineering, Cursor, prompt engineering, Agile

Projects

IdentityForge Code | *Python, OAuth, JWT, RBAC*

- Built identity services with token authentication, role-based authorization, secure REST integration, and automated access enforcement tests.

Linguistix | *Kubernetes, Docker, AWS ECS, CI/CD*

- Deployed containerized Python APIs on AWS ECS with CodePipeline CI/CD, validation checks, and production monitoring for distributed workloads.

Blockchain User Authentication | *Identity, RBAC, Cryptographic Trust*

- Designed decentralized authentication across four permission tiers with tamper-proof credential verification and role-based access control patterns.
