Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer pursuing an MSCS at USC with 2+ years building web-based tools and interactive data visualizations in React, JavaScript, and Python, with healthcare and regulated-domain experience turning complex data into intuitive, review-ready interfaces backed by SQL and REST APIs.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **web-based dashboards and data visualizations** on SQL-backed services for 500+ users, optimizing queries and indexing to cut render latency from 1.2s to 350ms.
- Designed **PostgreSQL and SQL Server schemas** with data validation and reconciliation, troubleshooting and enhancing backend services to maintain 99%+ reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built a **React and JavaScript interface** with an MVC Flask backend (Blueprints) turning model and assay-style outputs into **review-ready visualizations** for 150+ users.
- Developed **REST APIs and interactive review workflows**, debugging and testing existing codebases to improve accuracy and reduce turnaround **60%**.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **web service APIs** with OOP MVC patterns and 20+ test suites, managing **Git branching strategies** (feature, staging, production) and CI/CD across platforms.
- Troubleshot, debugged, and **enhanced existing codebases**, optimizing performance to improve response times **30%** in an Agile collaborative environment.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed **full-stack MERN web tools** with interactive analytics **dashboards and visualizations** across eight services, syncing 2M+ records with role-based access.
- Built **REST APIs and real-time WebSocket interfaces** with monitoring and testing, improving usability and cutting deployment time **50%** on Azure.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **React and TypeScript front-end interfaces** (HTML/CSS) with real-time data visualization and Flask APIs for 50K+ records, delivering sub-200ms responses.
- Integrated **analytics pipelines** (Databricks, Spark) rendering booking and revenue insights, documenting workflows for cross-functional analyst reporting.

Skills

Languages: JavaScript/TypeScript, Python, SQL, Java, PHP, C++
Frontend & Visualization: React.js, HTML5, CSS3, D3.js, Data Visualization, Interactive Dashboards
Backend & MVC: Flask, Node.js, Express (MVC), FastAPI, REST APIs, Spring Boot
Databases & ORMs: PostgreSQL, MySQL, SQL Server, MongoDB, Data Modeling, ORMs
Cloud & DevOps: AWS, Azure, Docker, CI/CD, Git, Gitflow Branching, Web Performance Optimization
Domain & Practices: Healthcare/Clinical Workflows, Regulated Environments, Agile, Testing, Debugging, Documentation

Projects

HMIS Live | *MERN, TypeScript, Regulated Healthcare*

- Built a **clinical healthcare web platform** (MERN, TypeScript) with consent-based patient-record access and review dashboards in a regulated domain, reducing administrative workload **30%**.

CPU Scheduling Simulator Live | *React.js, JavaScript, EJ-2*

- Built an **interactive browser visualization** (React, EJ-2) rendering Gantt charts and real-time scheduling metrics across 1K+ simulated scenarios, cutting debugging time **20%**.

Big-Brain Live | *React, GCP, FAISS, REST APIs*

- Built a **data-heavy web application** rendering semantic search and document insights over 50K+ records with a responsive React UI and sub-second retrieval.
