Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer completing an MSCS at USC with internship experience designing, developing, testing, and supporting business applications on **Microsoft Azure**, **SQL Server**, and full-stack web technologies. Strong in **C#/.NET**, **JavaScript**, **Angular**, REST APIs, and Agile delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Software Engineering, Database Systems, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, OOP, Data Structures

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Designed and implemented application modules on **Microsoft Azure SQL** and cloud services for **500+ users**, optimizing queries and supporting reliable integrations processing **5K+ monthly jobs** with **99%+ uptime**.
- Led testing, validation, and CI/CD implementation for production releases, partnering with business and technology stakeholders to deliver maintainable, scalable solutions in Agile sprints.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed full-stack features with **HTML**, **CSS**, **JavaScript**, and backend services supporting **10K+ daily requests**, advising product partners on implementation approaches for instructor-facing enhancements.
- Built and tested REST APIs with structured JSON responses on AWS RDS, reducing manual turnaround by **60%** through reliable, maintainable modules and documented knowledge-transfer workflows.

Aasma Technology Solutions **India**
Software Engineer - (SecureSync) *August 2023 – July 2024*

- Developed and tested cross-platform applications across **Windows** and **Linux** with REST integrations and **20+ automated test suites**, improving API performance by **30%** using Agile Scrum best practices.
- Created maintainable service modules and ETL routines with AWS pipelines, conducting knowledge transition through documentation and stakeholder collaboration on feature design and support readiness.

Aasma Technology Solutions **India**
Software Engineer Intern - (VibrantChem) *May 2023 – August 2023*

- Built CRM applications on **Azure SQL**, **Azure App Services**, and REST web services syncing **2M+ records**, applying database design, query optimization, and NoSQL-adjacent operational data patterns.
- Automated builds, tests, and deployments through Jenkins and Docker pipelines, cutting release cycles by **50%** while supporting billing, lead management, and resource workflows in Agile team delivery.

Enterprise Applications Lab **India**
Software Engineer Intern *November 2022 – January 2023*

- Developed business application features in **C#**, **.NET**, and **SQL Server** with **Angular**-style UI modules, XML/JSON service integrations, and unit-tested routines for internal reporting workflows.
- Partnered with business users to refine requirements and deliver maintainable reporting modules, documenting solutions and supporting post-implementation troubleshooting across Windows-based enterprise application environments.

Skills

Development: C#, .NET, Angular, JavaScript, HTML, CSS, SQL, SQL Server, Azure SQL, NoSQL, MongoDB, REST APIs, SOAP (familiar), XML, JSON, messaging (familiar), OOP, MVC, webservices
Platform: Microsoft Azure, AWS, Windows, Linux, Git, CI/CD, Jenkins, GitHub Actions, unit testing, Agile, scalability, maintainability, best practices, documentation, communication

Projects

RetailOps Portal Code | *C#, .NET, SQL Server, Azure, Angular*

- Built a retail operations portal with **C#/.NET** services, **SQL Server** reporting, **Angular** UI, and **Azure**-ready REST/JSON integrations with unit tests.

Chat2SQL Code | *SQL Server, Database Design, Query Optimization*

- Developed database tooling with **SQL Server** integrations, schema validation, and optimized query workflows for enterprise relational application maintenance.

HMIS Live | *Full Stack, REST APIs, Business Applications*

- Delivered a live operations platform with appointment workflows and API integrations, reducing administrative workload by **30%** through maintainable full-stack design.
