Summary

Frontend engineer with 2+ years owning **React/TypeScript/Next.js** products end-to-end at startup pace. Built enterprise-style dashboards and 0→1 SaaS interfaces serving **500+** users with high agency, strong product taste, and clear communication across fast-moving cross-functional teams.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Software Engineering, Database Systems, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Object-Oriented Programming, Software Engineering, Data Structures, Computer Networks

Experience

USC Dornsife **Los Angeles, CA**
Frontend Engineer *September 2025 – Present*
- Owned **React/Next.js** dashboard experiences for 500+ users, reducing perceived latency from **1.2s to 350ms** through component optimization, query-aware rendering, and reusable UI patterns across a multi-tenant enterprise AI education platform.
- Scoped and shipped frontend releases with product owners and QA, integrating enterprise **AI-assisted** workflows, documenting deliverables, and iterating quickly on analytics views that support data-driven decisions in production environments.

Grad8 **Los Angeles, CA**
Founding Engineer Intern *June 2025 – August 2025*
- Led 0→1 **React** product flows for an AI grading platform serving **150+ instructors** and **10K+ daily requests**, owning upload, rubric, grading-history, and feedback interfaces from discovery through production deployment on **Vercel**.
- Partnered with founders on frontend architecture, design-system-style component reuse, and rapid experimentation, cutting instructor feedback turnaround by **60%** while maintaining polished responsive UX under peak concurrent usage.

USC AD Labs **Los Angeles, CA**
Product Engineering Assistant *January 2025 – May 2025*
- Built evaluation tooling and reporting views across **100K+ records**, translating complex model outputs into actionable product insights and clear stakeholder communication for cross-functional research and engineering partners.
- Contributed to technical analysis and solution design with high agency in a fast-moving team, documenting findings and recommending frontend-friendly abstractions as prototypes matured toward production-quality decision-support experiences.

Aasma Technology Solutions **India**
Frontend Engineer - (SecureSync) *August 2023 – July 2024*
- Shipped **React/TypeScript** interfaces and reusable components for a secure data-sharing platform, improving enterprise UX for low-bandwidth users by **25%** through pagination, field filtering, and performance-conscious API integration patterns.
- Maintained **20+ automated UI and integration test suites** in CI pipelines, increasing release confidence by **68%** while collaborating with developers, QA, and stakeholders across Agile sprints in a Microsoft/GitHub-adjacent environment.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **React/Node.js** CRM dashboards with **WebSockets** and REST APIs, delivering real-time operational views across **2M+ records** with **33% fewer sync conflicts** for multi-location resource and inventory-style enterprise workflows.
- Automated **Docker**-based deployment flows with Jenkins, cutting release time by **50%** while scoping features end-to-end with scrappy high-agency delivery across billing, lead management, and analytics-driven product improvements.

Skills

Frontend: **React**, **TypeScript**, **Next.js**, JavaScript, HTML5, CSS3, TailwindCSS, responsive design, component-driven development, design systems, state management, performance optimization, accessibility, product-minded UI
Product & Delivery: end-to-end ownership, 0→1 product building, high agency, scrappy execution, stakeholder communication, Agile, software craftsmanship, prototyping, cross-functional collaboration, founder mentality, enterprise dashboards
Tools: Git, GitHub Actions, Vercel, REST APIs, WebSockets, MongoDB, PostgreSQL, Figma (familiar), Storybook (familiar), CI/CD, Docker, Jest (familiar), SaaS UI, data visualization, rapid iteration, code reviews

Projects

FinNexus Live | *Next.js, TypeScript, TailwindCSS, WebSockets*
- Built a scalable fintech platform UI supporting **50K+ users** and **1M+ transactions** with Plaid linking, real-time WebSocket updates, advanced filtering, and polished responsive interfaces designed for high-trust enterprise-style financial workflows.

PiXMod Live | *Next.js, TypeScript, Stripe, MongoDB*
- Shipped AI-powered **Next.js** SaaS with Stripe billing, reusable component patterns, and premium UX flows, improving conversion by **18%** through performant interfaces, clear onboarding, and maintainable frontend architecture at startup velocity.

HMIS Live | *React, TypeScript, TailwindCSS, Enterprise APIs*
- Developed enterprise healthcare dashboards with consent-based workflows, appointment management, and structured data views, demonstrating regulated-domain UI patterns aligned with Fortune-scale operational software and complex multi-stakeholder product requirements.
