Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack Software Engineer pursuing an MSCS at USC with 2+ years building scalable, distributed web applications, RESTful services, and APIs, supporting production operations and championing code reviews, testing, and clear documentation across cloud platforms.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built **scalable backend services and RESTful APIs** on a distributed multi-tenant platform for 500+ users, optimizing queries and indexing to cut latency from 1.2s to 350ms.
- Supported **production operations** with monitoring, async job orchestration, and CI/CD releases across 5K+ monthly jobs, maintaining 99%+ reliability for mission-critical workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Built **full-stack web products** (React, Flask) and REST APIs delighting 150+ users, handling 10K+ daily requests with stable performance and CI/CD-driven releases.
- Performed **code reviews** and championed testing and security practices in an Agile team, balancing tech debt and reducing feedback turnaround **60%**.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **microservices and RESTful APIs** with OOP patterns and 20+ test suites, building **deployment and configuration pipelines** (Jenkins, AWS) across three operating systems.
- Improved response times **30%** and pipeline efficiency **68%** through API optimization and ETL redesign, collaborating in Agile sprints with Microsoft/GitHub stakeholders.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed a **full-stack communications platform** (MERN) with eight microservices including email/SMS notification services, syncing 2M+ records via real-time WebSockets.
- Automated **builds, releases, and Docker deployments** (Jenkins, Azure) with monitoring and DevSecOps checks, cutting deployment time **50%** and improving scalability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **Flask APIs and real-time messaging** flows using Firebase Cloud Messaging for 50K+ records, delivering sub-200ms responses across web and mobile channels.
- Integrated payment and webhook services with token-based auth and **documented system architecture** for client and team alignment, reducing manual handling **70%**.

Skills

Languages: Python, JavaScript/TypeScript, Java, SQL, C++, Bash
Backend & APIs: FastAPI, Flask, Node.js, Express, RESTful Services, Microservices
Frontend: React.js, Next.js, TailwindCSS, HTML/CSS, Responsive UI
Distributed & Scale: Distributed Systems, Scalability, Async Processing, WebSockets, Message Queues, Caching
Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, CI/CD, Configuration Management, Production On-Call
Databases & Practices: PostgreSQL, MongoDB, MySQL, Code Reviews, Testing, Agile, Documentation

Projects

HMIS Live | *MERN, Twilio, Sentry, TypeScript*
- Built a **full-stack healthcare platform** (MERN) with Twilio SMS notifications, consent-based access, and Sentry monitoring, reducing administrative workload **30%**.

FinNexus Live | *Next.js, Kubernetes, WebSockets, MongoDB*

- Built a **scalable platform** on Kubernetes for 50K+ users and 1M+ transactions with real-time updates, RESTful services, and CI/CD-backed deployment.

Big-Brain Live | *GCP, FAISS, REST APIs, Convex*

- Built an **AI document platform** with real-time multi-user collaboration and semantic search over 50K+ documents on a serverless, low-latency architecture.
