Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full Stack Engineer pursuing an MSCS at USC with 2+ years building **TypeScript/React/Next.js** frontends and **Python** backends on **PostgreSQL**, shipping production **LLM-powered** platforms with strong UX, performance, and security focus in early-stage environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Advanced NLP, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, OOP, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built full-stack features for an AI platform on **PostgreSQL** and FastAPI for 500+ users, optimizing query performance and cutting dashboard latency from 1.2s to 350ms for a responsive enterprise UX.
- Restructured async **LLM orchestration** with Python background workers and job-state transitions, processing 1K+ AI jobs and increasing throughput **3x** while maintaining production reliability and security controls.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Engineered a full-stack **LLM-powered** platform (**React**, **TypeScript**, Python/Flask) applying multimodal models to 10K+ daily requests for 150+ users with stable production performance.
- Iterated with stakeholders on UX improvements, documentation, and code reviews, reducing feedback turnaround **60%** while shipping secure file ingestion and rapid feature enhancements.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Built **REST API** services and integrations with automated testing and CI/CD, improving response times **30%** while collaborating with cross-functional teams in fast-paced Agile sprints.
- Troubleshot production defects independently, boosting pipeline efficiency **68%** and documenting fixes to improve platform reliability for enterprise customers.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed full-stack **React/Node.js** features with REST APIs and **PostgreSQL**-style relational schemas on Azure SQL, syncing 2M+ records across eight enterprise microservices.
- Shipped Docker and Jenkins CI/CD releases with validation gates, cutting deployment time **50%** while improving UI responsiveness and operational dashboards for business users.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **React/TypeScript** interfaces with Python Flask APIs for 50K+ records, translating user requirements into shipped features with sub-200ms responses and polished end-user workflows.
- Resolved production bugs via logging and validation, reducing manual handling **70%** while documenting architecture for rapid iteration with internal stakeholders.

Skills

Frontend: TypeScript, JavaScript, React.js, Next.js, HTML, CSS, TailwindCSS, Responsive UI
Backend: Python, FastAPI, Flask, Node.js, Express.js, REST APIs, Microservices
Data & AI: PostgreSQL, SQL, LLM Systems, NLP, ETL Pipelines, Schema Design, Query Tuning
Cloud & Tools: AWS, Docker, Kubernetes, CI/CD, Git, JIRA, Agile, Security, Performance Optimization

Projects

Big-Brain Live | *React, PostgreSQL, LLM, Semantic Search*
- Built an **LLM-powered SaaS platform** for secure document upload, semantic search, and collaborative Q&A over 50K+ records on **PostgreSQL** with sub-second retrieval latency.

FinNexus Live | *Next.js, TypeScript, MongoDB, Kubernetes*
- Built a full-stack **Next.js/TypeScript** platform for 50K+ users and 1M+ transactions with real-time updates, secure access, and performance-tuned UI components.

HMIS Live | *MERN, TypeScript, REST APIs, TailwindCSS*
- Built an enterprise **web application** with role-based workflows, REST integrations, and operational dashboards, reducing administrative workload **30%** for daily users.
