Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | sahaj-bhadja | sahajbhadja | sahaj-bhadja

Summary

Software Engineer I candidate with 2+ years designing, developing, testing, and deploying cloud-backed applications using **Java/Spring Boot**, **Python**, and **SQL**. Strong analytical skills, Agile teamwork, and eagerness to learn technologies supporting software-hardware integrated enterprise products.

Education

University of Southern California, Los Angeles, CA — **August 2024 – May 2026**
Master of Science in Computer Science — *GPA: 3.75/4.0*
Coursework: Analysis of Algorithms, Software Engineering, Database Systems, Operating Systems

Pandit Deendayal Energy University, Gandhinagar, India — **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering — *GPA: 3.88/4.0*
Coursework: Data Structures, Object-Oriented Programming, Software Engineering, Computer Networks

Experience

USC Dornsife — **Los Angeles, CA**
Software Engineer — *September 2025 – Present*

- Analyzed, designed, and developed cloud-backed platform services for 500+ users, completing coding, debugging, testing, and deployment phases while maintaining documentation and achieving **99%+ reliability** across **5K+ monthly** production jobs.
- Conducted performance analysis and recommended query and indexing improvements that reduced dashboard latency from **1.2s to 350ms**, collaborating with teammates in Agile sprints to deliver quality software meeting stakeholder requirements.

Grad8 — **Los Angeles, CA**
Software Engineer Intern — *June 2025 – August 2025*

- Completed full software development lifecycle work on customer-facing features and **Python** services handling **10K+ daily requests**, including automated testing, deployment, and documentation that reduced manual processing by **60%**.
- Collaborated with cross-functional teammates to establish requirements, debug defects, and deliver solutions across multiple project phases while communicating technical results clearly in a fast-paced team environment.

Aasma Technology Solutions — **India**
Software Engineer - (SecureSync) — *August 2023 – July 2024*

- Developed and tested **Java/Spring Boot** microservices and **Python** integrations with **SQL** backends, improving API response by **30%** while maintaining **20+ unit and integration test suites** in Jenkins CI pipelines across Windows and Linux.
- Supported cross-platform software delivery and system integrations in Agile Scrum, creating technical documentation, reviewing design changes, and applying problem-solving judgment to improve performance and program consistency.

Aasma Technology Solutions — **India**
Software Engineer Intern - (VibrantChem) — *May 2023 – August 2023*

- Built cloud-connected application modules with **Azure SQL**, REST APIs, and real-time updates across **2M+ records**, validating functionality through automated tests and Docker/Jenkins deployment workflows that cut release cycles by **50%**.
- Created and maintained project documentation for code and test results while analyzing process bottlenecks and recommending software improvements for customer-facing operational dashboards used by distributed services teams.

MedDevice Test Systems — **India**
Software Engineer Intern — *January 2023 – April 2023*

- Developed **Python** libraries and automated test workflows for connected device software, supporting hardware-software integration scenarios with deterministic logs, simulators, and validation checks across device communication lifecycles.
- Integrated test suites into CI pipelines with standardized documentation and coverage reporting, collaborating with engineering partners to debug failures and improve reliability of production-oriented device support software.

Skills

Languages: **Java**, **Spring Boot**, **Python**, JavaScript, TypeScript, SQL, C++, Bash, OOP, data structures, algorithms
Cloud & Systems: **Azure**, AWS, GCP (familiar), Docker, Kubernetes (familiar), PostgreSQL, MySQL, SQL Server, REST APIs, microservices, operating systems, cross-platform development, hardware-software integration (familiar)
SDLC: Agile, Scrum, unit testing, JUnit, PyTest, Mockito, CI/CD, Jenkins, GitHub Actions, Git, debugging, technical documentation, code reviews, problem solving, quantitative analysis, willingness to learn, team collaboration

Projects

Chat2SQL Code | *Java, Spring Boot, PostgreSQL, Docker*

- Built **Java/Spring Boot** services with PostgreSQL and MongoDB integrations plus **Docker** workflows and automated validation, supporting schema exploration, testing, and deployment across enterprise-style multi-database software development environments.

HMIS Live | *Enterprise Product Software, SQL, Agile Delivery*

- Developed enterprise operations software with appointment workflows, structured schemas, and user-facing modules, demonstrating end-to-end product development including requirements analysis, implementation, testing, and documentation for operational teams.

CPU Scheduling Simulator Live | *C++, Algorithms, Performance Analysis*

- Implemented scheduling **algorithms** in **C++** with quantitative performance analysis across **1K+** scenarios, interpreting results and recommending optimizations that reduced average turnaround time by **25%** in simulation workloads.
