Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

MSCS candidate at USC with internship experience supporting developer infrastructure on **Linux**: maintaining **CI/CD** pipelines, troubleshooting build failures, and unblocking engineers across **Docker**, **Kubernetes**, **Jenkins**, and **GitHub Actions**.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Operating Systems, Database Systems, Analysis of Algorithms, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, OOP, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Supported production **Python** services with **CI/CD**, logging, and automated validation for 500+ users while improving latency **1.2s to 350ms** and maintaining 99%+ reliability on **PostgreSQL** backends.
- Monitored workflows processing 5K+ monthly jobs with reconciliation checks and alerting, documenting runbooks to accelerate triage and unblock cross-team developers during production failures.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Maintained production **Flask APIs** on **AWS** with **GitHub Actions CI/CD** for 150+ users and 10K+ daily requests, owning deployment validation, documentation, and stable build performance during rapid iteration cycles.
- Served as responsive support for cross-functional engineers through code reviews and pairing, reducing feedback turnaround **60%** while independently diagnosing pipeline failures and local environment issues.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Owned **Jenkins** build pipelines with nightly VM automation and parallel **Linux**, Windows, and macOS validation, boosting efficiency **68%** while triaging build failures with Microsoft/GitHub partners.
- Maintained 20+ **PyTest** unit and integration suites, improving API response times **30%** and documenting release workflows to reduce manual validation and accelerate infrastructure handoffs.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Automated **Docker** packaging and **Jenkins CI/CD** for eight microservices on **Azure**, cutting deployment time **50%** while improving observability through **Sentry**, Azure Monitor, and structured logging.
- Monitored data sync for 2M+ records on **Azure SQL**, strengthening pipeline reliability through schema design, query tuning, and performance diagnostics across production workflows.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **Flask APIs** and ingestion pipelines for 50K+ records with sub-200ms responses, documenting system behavior and collaborating on integration requirements across 12+ backend endpoints.
- Diagnosed production defects via logging and monitoring, reducing manual handling **70%** while independently unblocking integration issues and supporting cross-platform delivery workflows.

Skills

Languages: Python, C++, Java, Bash, SQL, JavaScript
Dev Infrastructure: Linux, CI/CD, build pipelines, Jenkins, GitHub Actions, Git, Docker, Kubernetes
Cloud & Monitoring: AWS, Azure, logging, Sentry, Azure Monitor, incident triage, troubleshooting
Backend: FastAPI, Flask, REST APIs, PostgreSQL, ETL pipelines, microservices, automated testing
Practices: PyTest, documentation, Agile, cross-functional collaboration, performance optimization, problem-solving

Projects

Linguistix Code | *Python, AWS ECS, Docker, CI/CD*
- Built containerized **REST API** on **AWS ECS/Fargate** with **Docker** and CodePipeline **CI/CD**, automated validation gates, and production troubleshooting workflows across cloud deployment pipelines.

FinNexus Live | *Next.js, TypeScript, Kubernetes, WebSockets*
- Deployed scalable platform on **Kubernetes** for 50K+ users and 1M+ transactions with real-time updates, secure access controls, and performance-tuned backend services under high transaction volume.

Chat2SQL Code | *Java, TypeScript, Docker, Cross-Platform*
- Developed cross-platform developer tooling with **Docker** deployment on Windows, macOS, and **Linux**, supporting schema validation and query workflows across 10+ database systems on **Java** and **TypeScript**.
