Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Backend Software Engineer with 2+ years building **Java/Python services**, **SQL Server workflows**, microservices, and **automated delivery** across Azure/AWS environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, Software Engineering, Object-Oriented Programming

Experience

USC Dornsife | *Software Engineer* | *Los Angeles, CA* **September 2025 – Present**
- Achieved 99%+ reliability across 5K+ monthly jobs through **incremental data pipelines**, implementing validation, reconciliation, error handling, cloud storage, CI/CD releases, and stable production monitoring workflows reliably at scale.
- Reduced query latency by 35% through **PostgreSQL and SQL Server optimization**, implementing normalized schemas, indexed access paths, data validation, and SQL transformations across 10K+ structured enterprise records.

Grad8 | *Software Engineer Intern* | *Los Angeles, CA* **June 2025 – August 2025**
- Reduced feedback turnaround by 60% through a **production Python platform** supporting 150+ instructors and 10K+ daily requests with REST APIs, AWS RDS, secure ingestion, and CI/CD workflows.
- Processed 1K+ files per batch using **Python multithreading**, validating heterogeneous inputs while isolating failures and preserving responsive user workflows during concurrent processing and sustained production traffic reliably.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) | *India*
- Improved API response times by 30% through **object-oriented microservices**, indexing, caching, pagination, and filtered payloads while debugging integrations across Windows, Linux, and macOS production environments reliably at scale.
- Automated builds and 20+ unit/integration suites through **Jenkins, GitHub, PyTest, and Mockito**, generating failure reports and coverage summaries across Linux, Windows, and macOS with repeatable nightly workflows.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) | *India*
- Synchronized 2M+ records through an eight-service **React and Node.js platform** covering authentication, resources, customers, billing, leads, permissions, and notifications with WebSockets and Azure SQL across locations and workflows.
- Reduced resource wastage by 42% through **automated testing and deployment**, implementing JWT access controls, WebSocket updates, Azure monitoring, Docker/Jenkins pipelines, and ARM templates across eight modular service domains.

LST Capitals | *Web Developer Intern* | *India* **November 2022 – January 2023**
- Delivered **sub-200ms Flask APIs** across 50K+ booking records, implementing pricing, validation, payment webhooks, Firebase synchronization, and database transactions while preventing conflicting reservations across concurrent customer workflows reliably.
- Streamlined project delivery by 22% through a **Spring Boot API and Firebase integration**, applying unit automation, version control, and cross-platform workflows while collaborating directly with teammates and clients.

Skills

Languages: Java, Python, SQL, TypeScript, JavaScript, C++, Bash
Backend & APIs: Spring Boot, FastAPI, Flask, Node.js, REST APIs, Microservices, WebSockets, Object-Oriented Programming
Data & Cloud: SQL Server, PostgreSQL, MySQL, MongoDB, NoSQL, Azure SQL, AWS RDS, Data Modeling, Query Optimization
Delivery & Operations: Azure, AWS, Docker, Jenkins, CI/CD, Git, JIRA, Scrum
Quality & Engineering: Unit Testing, Integration Testing, PyTest, Mockito, Debugging, Root-Cause Analysis, Error Handling, Data Validation, Technical Documentation

Projects

Tax Data Validation Service - Design Concept
- Designed a **tax-data validation service** concept using Java, Spring Boot, SQL Server, REST APIs, rule-based checks, reconciliation reports, audit trails, error handling, and repeatable deployment workflows for controlled processing.

Production Support Platform - Design Concept
- Designed a **production-support platform** concept for distributed services, combining health checks, structured logs, incident triage, release tracking, rollback guidance, dependency visibility, and documented operational runbooks across Azure environments.

Chat2SQL
- Built a **Java and TypeScript SQL workspace** supporting 10+ databases, implementing schema-aware query generation, validation, Dockerized workflows, and structured execution with 82% accuracy across relational database environments.
