Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Application Software Engineer with 2+ years building **Java/TypeScript platforms**, **React and REST applications**, AWS container infrastructure, and **reliable CI/CD workflows** across SQL and NoSQL systems.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, Software Engineering, Object-Oriented Programming

Experience

USC Dornsife | *Software Engineer* | *Los Angeles, CA* **September 2025 – Present**
- Tripled concurrent throughput across 1K+ AI jobs by restructuring **fault-tolerant services** with explicit state transitions, failure isolation, recoverable background processing, and observable workflows under sustained production load reliably.
- Achieved 99%+ reliability across 5K+ monthly jobs through **cloud data pipelines**, implementing validation, reconciliation, error handling, incremental processing, CI/CD releases, and stable production monitoring workflows at enterprise scale.

Grad8 | *Software Engineer Intern* | *Los Angeles, CA* **June 2025 – August 2025**
- Reduced feedback turnaround by 60% through a **production web platform** supporting 150+ instructors and 10K+ daily requests with React, Python APIs, AWS RDS, secure ingestion, and CI/CD.
- Processed 1K+ files per batch using **Python multithreading**, validating heterogeneous inputs while isolating failures and preserving responsive user workflows during concurrent processing and sustained production traffic reliably.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) | *India*
- Improved API response times by 30% through **object-oriented microservices**, indexing, caching, pagination, and filtered payloads while debugging integrations across Windows, Linux, and macOS production environments reliably at scale.
- Automated builds and 20+ unit/integration suites through **Jenkins, GitHub, PyTest, and Mockito**, generating failure reports and coverage summaries across Linux, Windows, and macOS with repeatable nightly workflows.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) | *India*
- Synchronized 2M+ records through an eight-service **React, Node.js, and Azure SQL platform** covering authentication, resources, customers, billing, leads, permissions, and notifications with real-time updates across distributed business locations.
- Reduced resource wastage by 42% through **secure data synchronization**, implementing JWT access controls, WebSocket updates, automated tests, monitoring, and Docker/Jenkins deployments across eight modular product service domains.

LST Capitals | *Web Developer Intern* | *India* **November 2022 – January 2023**
- Improved cross-platform compatibility by 15% through **React Native and TypeScript interfaces**, integrating Android, iOS, and web booking workflows while reducing design errors by 25% through reusable components.
- Designed end-to-end system architecture across 12+ **backend integration points**, translating client requirements into API workflows and presenting technical decisions before implementation to align delivery expectations professionally and clearly.

Skills

Languages: Java, TypeScript, Python, JavaScript, C++, SQL, Bash
Frontend & APIs: React, React Native, Next.js, Node.js, Express.js, FastAPI, Flask, Spring Boot, REST APIs, WebSockets, Microservices
Databases: PostgreSQL, SQL Server, MySQL, MongoDB, Azure SQL, AWS RDS, Firebase, Data Modeling, Query Optimization
Cloud & Infrastructure: AWS, Azure, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Cloud Storage, Infrastructure as Code, ARM Templates
Engineering Practices: Git, GitHub, Unit Testing, Integration Testing, Automated Testing, PyTest, Mockito, Jest, Selenium, Debugging, Monitoring, Performance Optimization, Technical Documentation, Agile, Scrum

Projects

Mission Operations Enterprise Platform - Design Concept
- Designed a **mission-operations platform** concept with Java services, TypeScript/React interfaces, REST APIs, PostgreSQL and MongoDB storage, AWS deployment, Kubernetes orchestration, automated tests, observability, and documented operator workflows.

FinNexus | Live
- Built a **TypeScript fintech platform** supporting 50K+ users and 1M+ transactions with secure bank linking, real-time synchronization, advanced filtering, Kubernetes deployment, and MongoDB-backed data access at production scale.

Big-Brain | Live
- Built an **AI-powered cloud platform** with secure authentication, real-time collaboration, semantic search, and ingestion across 50K+ documents, reducing review time by 60% through scalable automated workflows reliably.
