Summary

Frontend Engineer with 2+ years of experience building **React/Next.js applications**, **TypeScript interfaces**, and reliable customer-facing workflows through APIs, testing, debugging, and performance optimization.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Reduced dashboard latency from 1.2s to 350ms through **frontend and SQL performance optimization**, supporting 500+ users with responsive views, normalized data models, row-level isolation, and efficient access patterns.
- Achieved 99%+ reliability across 5K+ monthly jobs through **production data workflows**, implementing incremental processing, validation, reconciliation, error handling, cloud storage, CI/CD releases, and stable observability reliably daily.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Reduced feedback turnaround by 60% for 150+ instructors through a **React and Flask platform**, connecting upload, rubric generation, evaluation, and history workflows while handling 10K+ daily requests.
- Processed 1K+ files per batch using **Python multithreading**, validating heterogeneous inputs while isolating failures and preserving responsive customer workflows during concurrent model execution and production traffic reliably.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- Improved API response times by 30% through **pagination, filtering, and caching**, optimizing indexed queries and low-bandwidth payloads while integrating cross-platform services with object-oriented modules and maintainable API design patterns.
- Automated builds and 20+ unit/integration suites through **Jenkins and GitHub**, adding failure reports and cross-platform validation across Linux, Windows, and macOS with repeatable nightly workflows reliably daily.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Reduced resource wastage by 42% through a **React and Node.js platform**, defining microservices for allocation, customers, billing, and notifications while supporting WebSocket synchronization of 2M+ records across locations.
- Increased lead conversions by 15% through **interactive CRM workflows** and usage analytics, integrating Azure SQL records, role-based access, real-time updates, automated tests, monitoring, and Docker/Jenkins deployments reliably.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Delivered **sub-200ms Flask APIs** across 50K+ booking records, implementing pricing, coupon validation, payment webhooks, and Firebase status synchronization while using transactions and locking to prevent conflicting reservations.
- Improved cross-platform compatibility by 15% through **responsive React Native interfaces**, supporting Android, iOS, and web booking workflows while reducing design errors 25% through reusable components and coordinated delivery.

Skills

Languages: TypeScript, JavaScript, HTML, CSS, Python, Java, SQL
Frontend: React, Next.js, React Native, Material UI, Tailwind CSS, Responsive Design, Reusable Components, State Management
APIs & Data: REST APIs, WebSockets, Webhooks, Node.js, Flask, FastAPI, PostgreSQL, MongoDB, Firebase
Testing & Quality: Jest, Mocha, Selenium, Unit Testing, Integration Testing, PyTest, Debugging, Data Validation
Delivery & Operations: Git, GitHub, Jenkins, CI/CD, Docker, Kubernetes, Sentry, Azure Monitor

Projects

Retail Experiment Designer - Design Concept

- Designed a **React/Next.js experiment-builder concept** with reusable TypeScript components, responsive layouts, validated forms, REST integrations, local draft state, experiment configuration steps, review screens, and unit-testable interaction boundaries.

Experiment Analytics and Rollout Dashboard - Design Concept

- Designed a **frontend analytics dashboard concept** presenting experiment metrics, confidence indicators, segment filters, rollout recommendations, loading and error states, reusable charts, responsive views, and traceable decision history.

FinNexus | Live

- Enabled secure bank linking and **real-time financial workflows** across 1M+ transactions using Plaid, Next.js, TypeScript, and MongoDB, combining transaction filtering, token-based access controls, and Kubernetes-backed deployment for 50K+ users.
