Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years shipping **full-stack product features** fast using **AI-assisted development**, React/TypeScript frontends, Python/Java backends, and iterative, user-feedback driven release loops.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*
- Owned **end-to-end feature delivery** for AI-enabled workflows serving 500+ users, reducing latency from **1.2s to 350ms** through fast iteration on backend logic and frontend data rendering.
- Shipped **FastAPI-based orchestration** for 5K+ monthly jobs with validation safeguards, improving release quality and creating shorter product feedback loops for high-impact user-facing functionality.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*
- Built **React + Flask full-stack features** handling 10K+ daily requests, translating rough requirements into production code, then iterating quickly based on instructor feedback and usage patterns.
- Improved **deployment speed** and reliability with CI/CD controls and concurrent processing, reducing turnaround time by **60%** while maintaining quality across rapidly evolving product releases.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 - May 2025*
- Developed **Python experimentation pipelines** processing 100K+ trajectory logs, enabling quick hypothesis testing and pragmatic iteration cycles that balanced delivery speed with reproducibility and engineering quality.
- Documented validation outcomes and debugging findings, accelerating handoffs across engineering collaborators and reducing time-to-fix for model and workflow defects discovered during active iteration phases.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*
- Delivered **API and ETL capabilities** with OOP, AWS Glue, and S3, improving response times by **30%** while supporting cross-functional feature development in a fast-moving Agile environment.
- Maintained **20+ unit/integration suites** using Jenkins, PyTest, and Mockito, boosting pipeline efficiency by **68%** and enabling safer rapid releases across three operating environments.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*
- Built **MERN product modules** with REST APIs and WebSockets for eight workflows and 2M+ records, shipping user-facing improvements quickly while preserving stable backend/frontend integration behavior.
- Automated deployment and testing with **Jenkins** and **Docker**, reducing deployment time by **50%** and giving the team faster, safer release cycles for frequent product updates.

Skills

Languages: **TypeScript**, **JavaScript**, **Python**, Java, SQL, C++
Full Stack: React.js, Next.js, Flask, FastAPI, Node.js, REST APIs, responsive UI development
AI-First Development: Cursor/Copilot-style workflows, LLM integration patterns, rapid prototyping and refactoring
Data & Cloud: PostgreSQL, MySQL, MongoDB, AWS (S3/Glue/RDS), Azure SQL, Docker, Kubernetes
Delivery: Git, CI/CD, unit/integration testing, Agile/Scrum, production debugging, user-feedback iteration

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Shipped **production full-stack workflows** for 50K+ users and 1M+ transactions with real-time updates, secure integrations, and scalable deployments optimized for rapid product iteration.

Chat2SQL Code | *Java, TypeScript, SQL, Maven, Docker*
- Built an **AI-assisted product interface** across 10+ databases with schema-aware query generation and structured summaries, enabling faster experimentation, personalization-style outputs, and pragmatic shipping velocity.

HMIS Live | *MERN, ABDM APIs, Twilio*
- Developed **user-centered healthcare workflows** supporting 100+ daily appointments, integrating API-backed automation and monitoring checks that improved record retrieval by **2x** and overall product reliability.
