Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **data-driven product features**, **REST services**, and **operational reliability tooling** using Python, JavaScript/TypeScript, SQL, cloud platforms, and collaborative Agile delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*
- Built **extensible backend components** over **Azure SQL/PostgreSQL** for 500+ users, reducing dashboard latency from **1.2s to 350ms** through schema optimization, query tuning, and performance-focused indexing.
- Implemented **reconciliation-backed release workflows** for 5K+ monthly jobs, improving **operational stability**, **incident traceability**, and cross-team visibility through structured logs and reliability-focused validation checks.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*
- Collaborated with **product and engineering teams** to ship **Flask + React** features handling 10K+ daily requests, converting requirements into modular APIs and maintainable user-facing platform components.
- Improved **code quality** and **release confidence** using concurrent controls and CI/CD pipelines in GitHub Actions, reducing turnaround time by **60%** while maintaining reliable behavior under peak traffic.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*
- Engineered **API and ETL workflows** with OOP, AWS Glue, and S3, improving response times by **30%** while supporting scalable data integration across distributed services and analytics pipelines.
- Built and maintained **20+ unit/integration suites** with Jenkins, PyTest, and Mockito across three OS environments, boosting pipeline efficiency by **68%** and reducing technical debt by **20%**.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*
- Developed **REST API and WebSocket modules** supporting eight workflows and 2M+ synchronized records, strengthening service extensibility and improving backend/frontend integration reliability across evolving product objectives.
- Automated deployments and testing with **Jenkins** and **Docker**, reducing deployment time by **50%** and improving project execution through repeatable releases and clearer status communication.

LST Capitals **India**
Web Developer Intern *November 2022 - January 2023*
- Built backend workflow integrations using **Flask APIs** and Firebase over 50K+ records, enabling stable payment and booking flows with improved data consistency and faster issue diagnosis.
- Implemented **webhook automations** and production-status reporting utilities, improving project timeline tracking, stakeholder updates, and operational confidence for platform changes requiring coordinated engineering execution.

Skills

Languages: **Python**, **JavaScript/TypeScript**, Java, SQL, C++
Backend & Data: REST APIs, Flask, FastAPI, Node.js, PostgreSQL, MySQL, MongoDB, SQL Server
Cloud & Platform: AWS (S3/Glue/RDS), Azure SQL, Docker, Kubernetes, Git, CI/CD pipelines
Quality & Ops: Unit/integration testing, Jenkins, GitHub Actions, production debugging, structured logging, dashboard-oriented performance optimization
Engineering Practices: Agile/Scrum, code reviews, cross-functional collaboration, technical documentation

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built **scalable product components** for 50K+ users and 1M+ transactions with real-time updates, secure integrations, and reliability-focused deployment workflows aligned with high-traffic platform objectives.

Chat2SQL Code | *Java, TypeScript, SQL, Maven, Docker*
- Developed a multi-database analytics workspace spanning 10+ databases with **schema-aware query generation**, **structured summaries**, and execution validation, enabling faster dashboard-backed exploration and safer data operations.

HMIS Live | *MERN, ABDM APIs, Twilio*
- Designed **API-driven healthcare workflows** supporting 100+ daily appointments, adding monitoring-backed operational checks that improved record retrieval by **2x** and strengthened production reliability across service integrations.
