Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years delivering **full-stack applications**, **telemetry-oriented data workflows**, and **cloud-native services** using JavaScript/TypeScript, Python, SQL, and Kubernetes-backed deployment practices.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*
- Built **dynamic data applications** over **Azure SQL/PostgreSQL** for 500+ users, reducing dashboard latency from **1.2s to 350ms** through schema optimization and performance-focused query tuning.
- Implemented **secure validation workflows** for 5K+ monthly jobs with reconciliation checks, improving **code quality**, release reliability, and operational maintainability across evolving telemetry-style reporting features.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*
- Collaborated with product owners and engineers to deliver **Flask + React** features handling 10K+ daily requests, translating requirements into responsive user workflows and maintainable API integrations.
- Added **maintainable tests** and CI/CD controls through GitHub Actions, reducing turnaround time by **60%** while preserving stable behavior during high-volume grading and content processing cycles.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*
- Engineered **API and data-pipeline components** using OOP, AWS Glue, and S3, improving response times by **30%** and supporting scalable telemetry-like ingestion across distributed service boundaries.
- Maintained **20+ unit/integration suites** with Jenkins, PyTest, and Mockito across three OS environments, improving regression reliability, deployment confidence, and delivery predictability in Agile sprint execution.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*
- Developed **REST API and WebSocket services** supporting eight workflows and 2M+ synchronized records, improving full-stack integration quality and enabling extensible platform components for future feature delivery.
- Automated deployments and testing with **Docker** and Jenkins, reducing deployment time by **50%** and strengthening post-release stability through repeatable, containerized rollout and rollback practices.

LST Capitals **India**
Web Developer Intern *November 2022 - January 2023*
- Built backend workflow integrations using **Flask APIs** and Firebase over 50K+ records, improving reliability of booking and payment operations with better data consistency and exception handling.
- Implemented **webhook-driven automations** and project-status reporting, improving cross-team communication, timeline visibility, and delivery coordination for iterative features requiring rapid requirement and technical updates.

Skills

Languages: **JavaScript/TypeScript**, **Python**, Java, SQL, C++
Full Stack: React.js, Flask, FastAPI, Node.js, REST APIs, responsive UI workflows
Data & Telemetry: PostgreSQL, MySQL, MongoDB, SQL Server, pipeline monitoring, dashboard-oriented data workflows
Cloud & Platform: Kubernetes, Docker, AWS (S3/Glue/RDS), Azure SQL, Git, CI/CD
Quality: Unit/integration testing, Jenkins, GitHub Actions, technical documentation, Agile/Scrum collaboration

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built **scalable full-stack components** for 50K+ users and 1M+ transactions with real-time updates, secure integrations, and **Kubernetes**-backed deployment workflows aligned to product performance objectives.

Chat2SQL Code | *Java, TypeScript, SQL, Maven, Docker*
- Developed a multi-database analytics workspace spanning 10+ databases with **schema-aware query generation**, execution validation, and structured summaries, enabling faster telemetry-style analysis and maintainable code evolution.

HMIS Live | *MERN, ABDM APIs, Twilio*
- Designed **API-driven workflows** supporting 100+ daily appointments, adding monitoring-backed checks that improved record retrieval by **2x** and strengthened reliability across user-facing and backend service interactions.
