Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **web applications**, **API/webhook integrations**, and **database-backed automation** using React, JavaScript/TypeScript, SQL, and cloud-connected backend services in Agile teams.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*
- Developed and maintained **React-facing data components** for 500+ users backed by **Azure SQL/PostgreSQL**, reducing dashboard latency from **1.2s to 350ms** through query and schema optimizations.
- Built **workflow automation and validation jobs** for 5K+ monthly runs, improving production reliability, issue detection, and support handoff quality for internal and external application users.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*
- Built **full-stack features** with Flask + React serving 10K+ daily requests, translating requirements into clean, maintainable APIs and frontend workflows in an Agile development lifecycle.
- Improved **CI/CD and debugging velocity** via concurrent-processing controls and GitHub Actions, reducing turnaround time by **60%** while maintaining stable behavior across rapid feature updates.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*
- Implemented **API and ETL integrations** using OOP, AWS Glue, and S3, improving response times by **30%** and enabling cleaner data exchange across operational systems.
- Maintained **20+ unit/integration suites** with Jenkins, PyTest, and Mockito, boosting pipeline efficiency by **68%** and reducing technical debt by **20%** across three OS environments.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*
- Built **REST API and WebSocket modules** supporting eight workflows and 2M+ synchronized records, improving application reliability and maintainability for nationwide enterprise operations.
- Automated deployments/testing with **Docker** and Jenkins, reducing deployment time by **50%** and improving release confidence through repeatable, documented delivery pipelines.

LST Capitals **India**
Web Developer Intern *November 2022 - January 2023*
- Developed **Flask API and webhook integrations** over 50K+ records, enabling secure interactions between booking/payment workflows and backend systems with improved operational visibility.
- Created **technical documentation and monitoring hooks** that improved issue traceability, collaboration with support teams, and response speed for application-level incidents.

Skills

Languages: **JavaScript/TypeScript**, **Python**, Java, SQL, C++
Frontend: **React.js**, HTML5, CSS3, Bootstrap/jQuery familiarity, responsive web UI implementation
Backend & Integrations: Flask, FastAPI, Node.js, REST APIs, webhooks, JSON/XML/CSV handling, workflow automation
Data & Storage: MySQL, PostgreSQL, MongoDB, SQL query debugging, ETL integration patterns
Tooling & Delivery: Git, GitHub, Jira, Jenkins, Docker, CI/CD, production log analysis, Agile/Scrum collaboration

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built **enterprise workflow tooling** for 50K+ users and 1M+ transactions with secure APIs, real-time updates, and maintainable full-stack architecture for operations-heavy environments.

Chat2SQL Code | *Java, TypeScript, SQL, Maven, Docker*
- Developed a **database-centric web application** spanning 10+ databases with schema-aware query generation and execution validation, improving reliability and speed of internal analytical workflows.

HMIS Live | *MERN, ABDM APIs, Twilio*
- Designed **API-driven operational modules** supporting 100+ daily appointments, adding monitoring-backed checks that improved record retrieval by **2x** and reduced issue-resolution time.
