# Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

## Summary

Full-stack engineer with 2+ years building **AI-enabled product features**, **microservice-style services**, and **scalable UIs** using React/TypeScript, Python, Java, Docker, and Kubernetes-backed delivery workflows.

## Education

**University of Southern California, Los Angeles, CA** **August 2024 – May 2026**
*Master of Science in Computer Science* *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies

**Pandit Deendayal Energy University, Gandhinagar, India** **November 2020 – May 2024**
*Bachelor of Technology in Computer Science and Engineering* *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

## Experience

**USC Dornsife** **LA, California**
*Software Engineer* *September 2025 - Present*
- Built **AI workflow services** and user-facing data interfaces for 500+ users, reducing latency from **1.2s to 350ms** through query optimization and responsive frontend/backend integration.
- Implemented **FastAPI orchestration** for 5K+ monthly jobs with validation safeguards, improving production reliability and enabling faster rollout of reusable features across multiple product workflows.

**Grad8** **LA, California**
*Software Engineer Intern* *June 2025 - August 2025*
- Developed **React + Flask full-stack features** handling 10K+ daily requests, translating product ideas into reusable components, APIs, and user workflows from ideation to production deployment.
- Improved **release velocity** with CI/CD controls and concurrent processing, reducing turnaround time by **60%** while maintaining quality under fast iteration and customer feedback loops.

**USC AD Labs** **Los Angeles, CA**
*ML Research Assistant* *January 2025 - May 2025*
- Built **Python experimentation pipelines** over 100K+ trajectory logs, accelerating model iteration and enabling rigorous evaluation of AI-driven behavior across complex, unstructured data contexts.
- Produced technical summaries and debugging diagnostics, helping teams quickly convert experimental findings into production-ready software decisions and resilient implementation plans.

**Aasma Technology Solutions** **India**
*Software Developer Engineer - (SecureSync)* *August 2023 - July 2024*
- Engineered **API and ETL microservice workflows** with OOP, AWS Glue, and S3, improving response times by **30%** and supporting scalable cloud-based data integrations.
- Maintained **20+ unit/integration suites** with Jenkins, PyTest, and Mockito, boosting pipeline efficiency by **68%** and reducing technical debt by **20%** across environments.

**Aasma Technology Solutions** **India**
*Full Stack Developer Intern* *May 2023 - August 2023*
- Built **MERN app modules** with REST APIs and WebSockets supporting eight workflows and 2M+ synchronized records, improving scalability and maintainability of customer-facing operations.
- Automated deployments and testing with **Docker** and Jenkins, reducing deployment time by **50%** and improving consistency of production releases for cross-functional teams.

## Skills

**Languages**: **Python**, **Go** familiarity, **Java**, **TypeScript/JavaScript**, C++, SQL
**Frontend**: **React.js**, reusable component architecture, responsive UI workflows
**Backend & Services**: FastAPI, Flask, Node.js, REST APIs, microservices patterns
**Platform & Infra**: **Docker**, **Kubernetes**, AWS (S3/Glue/RDS), Azure SQL, CI/CD, Git
**AI/ML Product Work**: LLM-enabled workflows, experimentation pipelines, model evaluation, unstructured-data processing contexts

## Projects

**FinNexus** Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built **scalable full-stack workflows** for 50K+ users and 1M+ transactions with secure APIs, real-time updates, and Kubernetes-backed deployment aligned to enterprise-grade reliability needs.

**Chat2SQL** Code | *Java, TypeScript, SQL, Maven, Docker*
- Developed an **AI-assisted app** across 10+ databases with schema-aware query generation and structured summaries, enabling rapid development of document/insight workflows for business users.

**HMIS** Live | *MERN, ABDM APIs, Twilio*
- Designed **API-driven operational services** supporting 100+ daily appointments, adding monitoring checks that improved record retrieval by **2x** and strengthened production workflow resilience.
