Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Web developer with 2+ years building and maintaining **JavaScript**, **HTML/CSS**, React, Python, API, and database-backed experiences. Skilled in structured content, accessibility, analytics, debugging, performance, and production support.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Software Engineering, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Data Retrieval, Software Engineering, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built and maintained a multi-tenant React and Python platform for 500+ users, improving indexed queries and page-loading workflows to reduce dashboard latency from 1.2 seconds to 350 milliseconds.
- Developed structured content and data integrations across FastAPI, Supabase, SQL Server, and cloud storage, processing 5,000+ monthly jobs with validation, reconciliation, documentation, monitoring, and 99%+ production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed responsive React interfaces and Python APIs for upload, content history, status, filtering, management, and feedback workflows, supporting 150+ instructors and more than 10,000 daily production requests.
- Troubleshot frontend and backend issues across secure PDF, DOCX, and ZIP ingestion, improving processing reliability and reducing user feedback turnaround 60% through automated testing and CI/CD releases.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Maintained cross-platform software and 20+ unit and integration test suites using Jenkins, PyTest, and Mockito, reviewing changes and debugging release failures across Windows, Linux, and macOS environments.
- Improved API and database performance using Python, SQL, filtering, pagination, indexing, and caching, reducing response times 30% while restructuring ETL workflows to increase overall processing efficiency 68%.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Enhanced an existing MERN resource-management platform with semantic web interfaces, REST APIs, WebSockets, and eight modular services supporting scalable customer, lead, billing, permissions, reporting, and notification workflows.
- Used Google Analytics to analyze traffic, load times, and drop-off points, reducing resource waste 42%, increasing lead conversions 15%, and guiding iterative improvements across data-driven website workflows.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Designed cross-platform web and mobile workflows in Figma, mapped 12+ third-party integration points, and implemented Flask, Firebase, payment, pricing, notification, and booking features for evolving client requirements.
- Delivered responsive customer workflows across 50,000+ structured records, reducing manual payment handling 70% and consistently maintaining sub-200-millisecond API responses through validation, indexing, testing, and synchronized cloud data.

Skills

Web Fundamentals: Semantic HTML5, CSS3, JavaScript, TypeScript, responsive design, server-rendered pages, URL parameters, 301 redirects
Frontend: React.js, Next.js, Material UI, Tailwind CSS, accessibility, technical SEO, JSON-LD, structured content, page performance
Backend & APIs: Python, FastAPI, Flask, Node.js, REST APIs, WebSockets, third-party integrations, content validation, data normalization
Data & Analytics: SQL, PostgreSQL, MySQL, SQL Server, MongoDB, Firebase, Google Analytics, schema design, reporting, ETL
Delivery: Git, GitHub Actions, Jenkins, CI/CD, Docker, AWS, Azure, GCP, Vercel, Render, Sentry, PyTest, debugging
Practices: Website maintenance, content migration, security, code reviews, Agile, remote collaboration, documentation, production support

Projects

Practice Site Migrator | *Python, Semantic HTML, JSON-LD, Redirects, SEO, Accessibility*
- Built a healthcare-site migration utility that normalizes location records, generates semantic server-rendered pages and JSON-LD, creates permanent redirect maps, and blocks publishing unless seven SEO and accessibility checks pass.

HMIS | Live | *React, TypeScript, Healthcare APIs, Sentry*
- Built a responsive healthcare platform with consent-based records access, scheduling, notifications, dashboards, validation, and Sentry monitoring, reducing administrative workload 30% while helping doctors retrieve patient histories twice as fast.

PiXMod | Live | *Next.js, TypeScript, MongoDB, Stripe*
- Built a responsive Next.js SaaS website with structured MongoDB content, semantic search, secure subscriptions, and scalable image workflows, processing 1,000+ assets while increasing premium conversion by 18%.
