Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years developing and supporting enterprise web applications, APIs, microservices, and database workflows using C#, Java, TypeScript, SQL, Azure, Kubernetes, Docker, Git, CI/CD, automated testing, and structured debugging.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Database Management, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, California*

- Architected multi-tenant application infrastructure on Azure SQL and Blob Storage with row-level isolation for 500+ users, reducing indexed-query latency from 1.2 seconds to 350 milliseconds through schema optimization.
- Built integrations across FastAPI, SQL Server, Supabase, and cloud storage, processing 5K+ monthly jobs with validation, reconciliation, error handling, and CI/CD-backed releases consistently achieving 99%+ production reliability.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, California*

- Implemented production web services on AWS serving 150+ users and 10K+ daily requests, with secure ingestion, automated tests, CI/CD deployment, and stable API performance during peak usage.
- Diagnosed application issues across React interfaces and backend workflows for uploads, history, configuration, and concurrent processing, reducing operational turnaround 60% while communicating fixes within an Agile team.

Aasma Technology Solutions **August 2023 – July 2024**
Software Development Engineer, SecureSync *India*

- Engineered cross-platform microservices with automated builds and 20+ unit and integration suites using Jenkins, PyTest, and Mockito across Windows, Linux, and macOS release environments consistently in production.
- Optimized object-oriented API integrations with AWS Glue and S3, improving response times 30% and pipeline efficiency 68% while reducing technical debt 20% through reusable services and structured reviews.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern, VibrantChem *India*

- Built a MERN enterprise operations platform with eight microservices, Azure SQL persistence, REST APIs, and WebSockets, reliably synchronizing 2M+ records across authentication, billing, resources, permissions, and notifications.
- Automated deployments with Jenkins CI/CD and Docker packaging, achieving 95%+ successful build validation and cutting release time 50% through repeatable configurations, staged testing, and documented deployment processes.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built Flask APIs for booking, pricing, payments, and status workflows, synchronizing 50K+ records through Firebase while reliably maintaining sub-200ms responses across mobile and web application clients in production.
- Designed end-to-end application architecture, mapped 12+ backend integration points, and presented requirements and technical tradeoffs to client stakeholders before implementation, reducing design errors 25% and strengthening delivery alignment.

Skills

Languages: C#, Java, TypeScript, JavaScript, Python, SQL, C++, HTML, CSS, Bash
Applications & APIs: Next.js, React, Node.js, FastAPI, Flask, Spring Boot, REST APIs, Microservices, WebSockets, OOP
Cloud & Data: Microsoft Azure, Azure SQL, SQL Server, PostgreSQL, MySQL, MongoDB, AWS, Docker, Kubernetes, Data Validation
SDLC & Quality: Git, GitHub, CI/CD, Jenkins, GitHub Actions, Unit Testing, Integration Testing, PyTest, Mockito, Debugging, Code Reviews, Agile

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker, Maven*

- Extended an enterprise-style database workspace across Java and TypeScript services, supporting 10+ relational and NoSQL systems with schema exploration, validated query generation, Docker deployment, Maven builds, and cross-platform workflows.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*

- Built a Next.js application supporting 50K+ users and 1M+ transactions with secure integrations, real-time synchronization, advanced filtering, automated deployment workflows, and reliable Kubernetes-backed production infrastructure at scale.

Big-Brain Live | *PostgreSQL, REST APIs, GCP, CI/CD*

- Engineered cloud ingestion and indexing workflows processing 50K+ records, implementing incremental updates, metadata persistence, authentication, validation, and performance tuning that consistently reduced application retrieval latency by 40%.
