Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Associate Solution Engineer with 2+ years translating operational needs into **technical solutions**, presenting architectures to clients, and delivering API-integrated cloud platforms through cross-functional collaboration, documentation, and Agile execution.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Operating Systems, Software Engineering

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Operating Systems, Data Retrieval, Software Engineering

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, California*
- Partnered with education stakeholders to translate reporting and workflow needs into a multi-tenant platform for 500+ users, using Azure SQL, dashboards, access controls, and normalized operational data.
- Delivered FastAPI integrations across PostgreSQL, SQL Server, and cloud storage, processing 5K+ monthly jobs with validation, reconciliation, documentation, and automated releases sustaining 99%+ production reliability for educators.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, California*
- Collaborated with instructors to convert grading pain points into secure upload, configuration, history, and live-feedback experiences, reducing turnaround 60% while supporting production workflows for 150+ users across courses.
- Designed concurrent processing and REST API integrations for 1K+ files per batch, communicating progress and technical tradeoffs while delivering fault-tolerant recovery, usage tracking, and stable performance under peak demand.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer, SecureSync *India*
- Collaborated with Microsoft and GitHub stakeholders during Agile sprints, translating integration requirements into object-oriented APIs and AWS Glue workflows that improved response times 30% and pipeline efficiency 68%.
- Automated nightly builds, installations, unit tests, integration tests, and stakeholder reports through Jenkins, validating cross-platform synchronization and enabling clear communication of release quality, defects, and operational readiness.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern, VibrantChem *India*
- Implemented eight MERN microservices spanning authentication, permissions, billing, resources, customers, leads, and notifications, reliably synchronizing 2M+ records through REST APIs and event-driven WebSocket updates across production business workflows.
- Built responsive React workflows and automated Docker deployments through Jenkins CI/CD, supporting demonstrations of customer, billing, and analytics capabilities while achieving 95%+ build validation across release environments.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*
- Designed an end-to-end service platform, mapped 12+ integration points, and presented the proposed architecture to client stakeholders, reducing design errors 25% through early discovery, feedback, and alignment.
- Built cross-platform booking workflows with Flask APIs, Firebase synchronization, payments, webhooks, and analytics ingestion, processing 50K+ records while maintaining reliable sub-200-millisecond responses across mobile and web clients.

Skills

Solution Engineering: Discovery, Requirements Analysis, Technical Presentations, Product Demonstrations, Solution Design, Customer Support, Technical Documentation, Stakeholder Communication

Integrations & Cloud: REST APIs, Webhooks, JSON, AWS, Azure, GCP, Docker, CI/CD, Microservices, Data Integration, Access Control

Programming & Data: Python, Java, JavaScript, TypeScript, React, Node.js, Flask, FastAPI, SQL, PostgreSQL, MySQL, Azure SQL

Delivery & Collaboration: Agile/Scrum, JIRA, Git, Postman, Cross-Functional Collaboration, Root Cause Analysis, Testing, Monitoring, Problem Solving, Public Speaking

Projects

HMIS – Hospital Management Information System Live | *TypeScript, ABDM APIs, Twilio, Sentry*
- Built an operational healthcare platform integrating consent-based ABDM APIs, appointment workflows, Twilio alerts, and Sentry monitoring, supporting 100+ daily appointments while reducing administrative workload 30% with reliable operational visibility.

Chat2SQL Code | *Java, TypeScript, SQL, Docker, Maven*
- Built an AI-assisted database workspace supporting 10+ database systems, combining schema exploration, SQL generation, and cross-platform deployment to simplify technical workflows through one unified interface for technical and nontechnical users.

Big-Brain Live | *LLaMA-2, FAISS, Pinecone, PostgreSQL, GCP*
- Built secure document upload, semantic search, real-time summarization, and collaborative workflows for 200+ users, reducing document-review time 60% while maintaining 95% query accuracy across 50K+ documents with responsive collaborative experiences.
