Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Solutions-focused Software Engineer with 2+ years delivering customer-aligned integrations and cross-platform applications using **Android/Linux**, **Java**, **REST APIs**, and **CI/CD** across technical troubleshooting and Agile delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, Object-Oriented Programming, Software Engineering, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *LA, California*

- Architected a multi-tenant platform on Azure SQL and Blob Storage with row-level isolation and normalized schemas for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Built and maintained FastAPI integrations across PostgreSQL, SQL Server, and cloud storage, processing 5K+ monthly jobs with validation, reconciliation, error handling, and **CI/CD** releases sustaining 99%+ production reliability.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *LA, California*

- Developed responsive React interfaces and Flask services for uploads, grading history, and feedback, reducing turnaround 60% while supporting 150+ instructors and 10K+ daily requests reliably in production.
- Implemented concurrent batch processing and secure PDF, DOCX, and ZIP ingestion through **REST APIs** and AWS RDS, executing 1K+ files per batch with fault-tolerant recovery and usage tracking.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- **Troubleshot** and optimized large-scale API integrations using object-oriented patterns, AWS Glue, and S3, improving response times 30%, pipeline efficiency 68%, and maintainability while reducing technical debt 20%.
- Automated nightly builds, installations, unit tests, integration tests, and reports through Jenkins across **Windows, Linux, and macOS**, collaborating with Microsoft and GitHub stakeholders throughout Agile sprint delivery.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Implemented eight modular microservices for authentication, resources, customer records, billing, leads, permissions, and notifications, synchronizing 2M+ records through REST APIs and event-driven WebSocket updates across business workflows.
- Automated Docker builds, tests, and staged deployments through Jenkins CI/CD, achieving 95%+ validation while using Sentry, Azure Monitor, and Kibana to support secure product rollouts and troubleshooting.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Translated **client requirements** into an end-to-end architecture, mapped 12+ integration points, and presented technical solutions for alignment before implementation, reducing design errors 25% through collaborative cross-functional planning.
- Built Spring Boot and Firebase services for cross-platform **Android**, iOS, and web booking workflows, integrating payments, coupons, and real-time status updates across 50K+ records with sub-200-millisecond responses.

Skills

Solutions: Technical Troubleshooting, Requirements Analysis, SDLC, Client Presentations, Stakeholder Communication, Technical Writing
Systems: Android, Linux, Windows, macOS, Device Drivers, SDK Compatibility, Peripheral Firmware, Product Rollouts
Languages & Apps: Java, Python, TypeScript, JavaScript, SQL, JSON, Spring Boot, React Native
Integration & DevOps: REST APIs, Webhooks, CI/CD, Jenkins, GitHub Actions, Git, Docker, Microsoft Azure, AWS S3
Testing & Data: Unit Testing, Integration Testing, JUnit 5, PyTest, Mockito, Selenium, Sentry, PostgreSQL, Firebase

Projects

FleetCheck | *Python, Android Logcat, Linux Syslog, Device Drivers, SDK Compatibility, PyTest*

- Built an **Android/Linux** fleet-readiness and triage toolkit validating upgrades, configurations, and peripheral SDK/driver compatibility; parsed 2,000 public logcat records with 99.8% field accuracy across 30 passing tests.

LoanLedger | *Java 21, Spring Boot, PostgreSQL, JUnit 5, Maven*

- Built an event-sourced loan ledger using **Java 21**, Spring Boot, PostgreSQL, and JUnit 5, with exactly-once webhooks and optimistic concurrency; passed 5,500 randomized invariant tests without double-posting.

Chat2SQL Code | *Java, TypeScript, SQL, Docker, Maven*

- Built a Java and TypeScript database workspace supporting 10+ systems, accelerating query authoring, schema exploration, and data management through reusable services and a unified cross-platform developer interface.
