Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack product engineer with 2+ years building and supporting **React**, **Python**, JavaScript, REST API, dashboard, and mobile workflows. Experienced in troubleshooting, user feedback, documentation, testing, and cloud delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Software Engineering, Database Systems, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Data Retrieval, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built and supported a multi-tenant React and Python platform for 500+ users, improving indexed queries and dashboard workflows to reduce customer-facing latency from 1.2 seconds to 350 milliseconds.
- Monitored 5,000+ monthly integration jobs across FastAPI, Supabase, SQL Server, and cloud storage, documenting workflows and proactively resolving validation failures while sustaining greater than 99% production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed responsive React interfaces and Python APIs for upload, history, status, filtering, and feedback workflows, reliably supporting 150+ instructors and handling more than 10,000 daily production requests.
- Used Claude, Codex, and Cursor for implementation, debugging, tests, and documentation with human review, reducing user feedback turnaround 60% while maintaining 90%+ consistency across AI-enabled grading workflows.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Supported cross-platform software through 20+ unit and integration suites using Jenkins, PyTest, and Mockito, investigating failures and clearly communicating release results across Windows, Linux, and macOS environments.
- Troubleshot API and database bottlenecks using Python, SQL, filtering, pagination, indexing, and caching, improving response times 30% and increasing ETL processing efficiency 68% for critical customer workflows.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Enhanced an existing MERN platform with dashboards, WebSockets, REST APIs, and eight services supporting customer, lead, billing, permissions, reporting, and notification workflows across two million synchronized records.
- Used Google Analytics to monitor traffic, load times, and adoption patterns, reducing resource waste 42%, increasing lead conversions 15%, and guiding iterative user-experience improvements across production workflows.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Translated client requirements into Figma workflows and 12+ integration points, then implemented Flask, Firebase, payment, pricing, notification, and booking features across responsive customer mobile and web experiences.
- Delivered customer-facing workflows across 50,000+ records, reducing manual payment support 70% and consistently maintaining sub-200-millisecond responses through API testing, synchronized data, real-time status updates, and issue resolution.

Skills

Frontend & Mobile: React.js, React Native, Next.js, JavaScript, TypeScript, HTML5, CSS3, responsive design, Material UI, Tailwind CSS
Backend & APIs: Python, FastAPI, Flask, Node.js, REST APIs, WebSockets, Java, C++, authentication, third-party integrations
Dashboards & Data: SQL, PostgreSQL, MySQL, SQL Server, MongoDB, Firebase, Google Analytics, reporting, visualization, ETL
Cloud & Delivery: Azure, AWS, GCP, Docker, Kubernetes, Vercel, Render, Jenkins, GitHub Actions, CI/CD, Git, Sentry
AI & Development: Claude, Codex, Cursor, LLM APIs, OCR, prompt workflows, test generation, debugging, human verification
Product Support: User training, technical documentation, issue triage, adoption monitoring, customer feedback, Agile, code reviews, testing, access control

Projects

Product Support Command Center | *React, TypeScript, Python, Dashboards, PyTest*
- Built and production-compiled a product-support dashboard with adoption metrics, deterministic issue prioritization, and searchable reviewed training guides; validated success-rate calculations and triage behavior through three automated tests.

HMIS | Live | *React, TypeScript, User Workflows, Sentry*
- Built a role-based healthcare application with scheduling, notifications, dashboards, validation, and Sentry monitoring, reducing administrative workload 30% while supporting reliable access and intuitive workflows for operational users.

Trend Tracker | Live | *React, Recommendations, Material UI, AWS*
- Built a customer-facing recommendation dashboard serving three million users with React and Material UI, integrating visual personalization and streamlined discovery while improving recommendation accuracy from 78% to 92%.
