Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **responsive web applications**, reusable React and TypeScript interfaces, scalable APIs, developer tooling, and secure production systems with emphasis on **performance**, reliability, testing, and user experience.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Software Engineering, Analysis of Algorithms, Database Systems

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Web Technologies, Object-Oriented Programming, Data Structures, Software Engineering

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, California*

- Architected a secure multi-tenant platform using Azure SQL and Blob Storage with normalized schemas for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds through query optimization.
- Built FastAPI integrations across PostgreSQL, SQL Server, and cloud storage, processing 5K+ monthly jobs with validation, error handling, monitoring, and automated releases sustaining 99%+ production reliability across recurring workflows.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, California*

- Built responsive React interfaces for uploads, history, configuration, and live feedback, reducing turnaround 60% while supporting intuitive production workflows used by 150+ instructors across varied course contexts.
- Designed Python REST services and concurrent batch processing for 1K+ files per run, delivering fault-tolerant recovery, real-time progress, usage tracking, and stable responsiveness under peak demand for production users.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer, SecureSync *India*

- Optimized API payloads through filtering, pagination, indexing, and caching, improving response times 30% for low-bandwidth users while increasing data-pipeline efficiency 68% and reducing technical debt 20% across production workflows.
- Engineered cross-platform software with automated builds and 20+ unit and integration test suites, validating behavior across three operating systems while collaborating with Microsoft and GitHub engineers during continuous delivery.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern, VibrantChem *India*

- Built responsive React workflows and eight modular MERN services for authentication, permissions, billing, resources, customers, leads, and notifications, synchronizing 2M+ records through REST APIs and WebSockets across production workflows.
- Automated Docker deployments through Jenkins CI/CD with unit, integration, and end-to-end validation, achieving 95%+ successful builds while integrating monitoring and secure checks across staging and production environments.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built responsive React and React Native booking experiences across web, Android, and iOS, integrating Flask APIs and Firebase synchronization while maintaining reliable sub-200-millisecond responses across 50K+ records.
- Designed end-to-end user workflows, mapped 12+ integration points, and presented architecture to client stakeholders, reducing design errors 25% through iterative feedback and cross-functional implementation alignment under evolving requirements.

Skills

Web Development: JavaScript, TypeScript, HTML, CSS, React.js, Next.js, Angular.js, TailwindCSS, Material UI, Responsive Design, Component-Based UI, State Management
Backend & Data: Python, Java, Node.js, Express.js, FastAPI, Flask, REST APIs, WebSockets, JSON, PostgreSQL, MySQL, MongoDB, NoSQL, Firebase
Performance & Quality: Performance Optimization, Query Optimization, Caching, Pagination, Unit Testing, Integration Testing, End-to-End Testing, Debugging, Monitoring, Secure Coding
Infrastructure & Delivery: Git, GitHub, Jenkins, GitHub Actions, CI/CD, Docker, Kubernetes, AWS, Azure, GCP, Linux, JIRA, Postman, Agile/Scrum, Code Reviews, System Design, Microservices, Cross-Functional Collaboration

Projects

FinNexus Live | *Next.js, TypeScript, TailwindCSS, MongoDB, WebSockets*

- Built a responsive fintech platform supporting 50K+ users and 1M+ transactions with secure bank linking, real-time synchronization, advanced filtering, tokenized access, and scalable Kubernetes deployment automation for dependable user experiences.

PiXMod Live | *Next.js, Angular.js, Stripe, MongoDB, CLIP*

- Built a responsive Next.js interface with Stripe subscriptions, scalable MongoDB storage, semantic image search, segmentation, and generative editing workflows, improving premium conversion 18% across an AI-powered SaaS experience.

HMIS – Hospital Management Information System Live | *TypeScript, TailwindCSS, REST APIs, Sentry*

- Built responsive appointment and dashboard workflows with TypeScript, TailwindCSS, consent-based APIs, automated notifications, and Sentry monitoring, supporting 100+ daily appointments while reducing administrative workload 30% through reliable user experiences.
