Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Product Engineer with 2+ years building **full-stack applications**, mobile-enabled interfaces, and secure **API integrations** using React, TypeScript, Node.js, Python, SQL, AWS, Azure, automated testing, and CI/CD.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Software Engineering, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Data Retrieval, Software Engineering, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, California*

- Architected a multi-tenant platform using Azure SQL and Blob Storage with row-level security and normalized schemas for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Built API integrations across FastAPI, PostgreSQL, SQL Server, and cloud storage, processing 5K+ monthly jobs with validation, reconciliation, error handling, and CI/CD releases sustaining 99%+ production reliability.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, California*

- Built responsive React interfaces and Python services for uploads, history, configuration, and live feedback, reducing user turnaround 60% while supporting reliable production workflows used by 150+ instructors.
- Designed concurrent processing and secure multi-format ingestion through REST APIs and AWS RDS, executing 1K+ files per batch with fault-tolerant recovery, usage tracking, and stable performance under load.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer, SecureSync *India*

- Designed object-oriented API integrations and AWS Glue transformations for JSON, CSV, and Parquet data, improving response times 30% and pipeline efficiency 68% while reducing technical debt 20%.
- Automated nightly builds, installations, integration tests, unit tests, and reports through Jenkins, validating reliable cross-platform synchronization while collaborating directly with Microsoft and GitHub stakeholders during Agile delivery.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern, VibrantChem *India*

- Implemented eight modular microservices for authentication, permissions, billing, resources, customers, leads, and notifications, reliably synchronizing 2M+ records through REST APIs and event-driven WebSocket updates across production workflows.
- Built responsive React workflows and automated Docker deployments through Jenkins CI/CD, achieving 95%+ build validation while integrating operational monitoring and analytics across controlled staging and production environments.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built cross-platform mobile and web booking workflows with Flask APIs, Firebase synchronization, payments, and webhooks, processing hourly Databricks micro-batches across 50K+ records with consistently reliable sub-200-millisecond responses.
- Designed end-to-end workflows, mapped 12+ integration points, and presented technical solutions to client stakeholders, reducing design errors 25% while supporting effective collaborative cross-functional implementation planning and alignment.

Skills

Full Stack: React, Angular, JavaScript, TypeScript, Node.js, Python, FastAPI, Flask, HTML, CSS, Java, Responsive Design
Integration & Data: REST APIs, Microservices, WebSockets, Webhooks, JSON, Authentication, Authorization, SQL, MySQL, PostgreSQL, SQL Server, MongoDB, Firebase
DevOps & Quality: AWS, Azure, Docker, Kubernetes, Jenkins, CI/CD, Git, GitHub, Postman, Unit Testing, Integration Testing, Debugging, Monitoring
Delivery: Agile/Scrum, Code Reviews, Requirements Analysis, Documentation, Release Management, Production Support, Security, Stakeholder Communication

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB, Plaid*

- Built a scalable application supporting 50K+ users and 1M+ transactions with Plaid integration, secure APIs, real-time synchronization, advanced filtering, and reliable Kubernetes-based deployment workflows at production scale.

HMIS - Hospital Management Information System Live | *TypeScript, MERN, REST APIs, Sentry*

- Implemented consent-based access, mobile-responsive workflows, REST integrations, automated alerts, and Sentry monitoring through scalable TypeScript services supporting 100+ daily operations while reducing hospital administrative workload by 30%.

Linguistix | *Python, AWS, Docker, CI/CD*

- Developed and deployed a containerized Python data-processing API on AWS with automated CI/CD releases, input validation, and reliability checks, achieving 87% measured accuracy across reliable production workflows.
