Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack Software Engineer with 2+ years building React applications, Node.js services, REST APIs, operational tooling, and production data workflows using TypeScript, JavaScript, MongoDB, PostgreSQL, Docker, CI/CD, and cloud infrastructure.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Database Management, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, California*

- Built data integration pipelines across FastAPI, SQL Server, Supabase, and cloud storage, processing 5K+ monthly jobs with incremental loads, validation, reconciliation, and error handling while achieving 99%+ production reliability.
- Designed a multi-tenant PostgreSQL schema supporting 200+ users and 10K+ structured records, implementing indexed queries, row-level isolation, and migration validation that consistently reduced production latency by 35%.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, California*

- Implemented production APIs on AWS serving 150+ users and 10K+ daily requests, with secure file ingestion, automated tests, CI/CD releases, and stable application behavior during peak usage.
- Developed React interfaces and backend workflows for uploads, history, configuration, and concurrent processing, reducing operational turnaround by 60% while communicating progress and technical constraints within a fast-moving team.

Aasma Technology Solutions **August 2023 – July 2024**
Software Development Engineer, SecureSync *India*

- Engineered cross-platform microservices with automated builds and 20+ unit and integration suites using Jenkins, PyTest, and Mockito across Windows, Linux, and macOS release environments consistently in production.
- Optimized object-oriented API integrations with AWS Glue and S3, improving response times 30% and pipeline efficiency 68% while reducing technical debt 20% through reusable services and structured reviews.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern, VibrantChem *India*

- Built a MERN operations platform with eight microservices for authentication, permissions, billing, resources, customers, leads, and notifications, synchronizing 2M+ records through REST APIs and real-time WebSocket updates.
- Automated application deployments with Jenkins CI/CD and Docker packaging, achieving 95%+ successful build validation and cutting cloud release time by 50% through repeatable environment configuration across deployments.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built Flask APIs for booking, pricing, coupons, payments, refunds, and status updates, synchronizing 50K+ records through Firebase while reliably maintaining sub-200ms responses across mobile and web clients.
- Integrated multi-currency cards, UPI, wallets, PayPal, payment webhooks, and dispute automation into a PCI-aligned workflow, reducing manual payment handling 70% while supporting real-time transaction visibility in production.

Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML, CSS, Bash
Full Stack: React, Next.js, Node.js, Express.js, REST APIs, WebSockets, Microservices, Tailwind CSS, Material UI
Data & Integrations: MongoDB, PostgreSQL, SQL Server, Firebase, Supabase, Data Migrations, Validation, Synchronization, Webhooks
Cloud & Delivery: AWS, Azure, GCP, Docker, Kubernetes, Git, CI/CD, Jenkins, GitHub Actions, Unit Testing, Integration Testing, Agile

Projects

Trend Tracker - Fashion Recommendation System Live | *React, Strapi, AWS EC2*

- Developed a fashion e-commerce platform with React, Strapi, and AWS EC2, integrating CNN-based recommendations that improved measured accuracy from 78% to 92% while supporting high-volume customer discovery workflows.

FinNexus Live | *Next.js, TypeScript, MongoDB, WebSockets*

- Built a full-stack platform supporting 50K+ users and 1M+ transactions with third-party integrations, token-based request controls, real-time synchronization, advanced filtering, and reliable Kubernetes-backed deployment workflows at scale.

HMIS - Operations Management Platform Live | *TypeScript, REST APIs, Twilio, Sentry*

- Implemented record-management, scheduling, alerts, and monitoring workflows through TypeScript-backed APIs, reducing administrative workload 30% while supporting secure data access, operational traceability, and consistently reliable daily business processes.
