Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building reliable **Python, Java, JavaScript, and SQL** applications, integrations, and reporting workflows.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Software Engineering, Analysis of Algorithms, Operating Systems

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Database Management, Web Technologies, Software Engineering

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, California*

- Architected a multi-tenant application using **Azure SQL and Blob Storage** with normalized schemas and row-level access controls for **500+ users**, reducing reporting dashboard latency from **1.2 seconds to 350 milliseconds**.
- Built **FastAPI integrations** across PostgreSQL, SQL Server, and cloud storage, processing **5K+ monthly jobs** with validation, reconciliation, error handling, documentation, and automated deployments sustaining **99%+ reliability** across recurring workflows.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, California*

- Built **Python services and React interfaces** for uploads, configuration, history, and live feedback, reducing turnaround **60%** while supporting reliable production workflows used by **150+ instructors** across multiple courses.
- Created and tested **concurrent processing** for **1K+ files per batch** through REST APIs and AWS RDS, implementing secure ingestion, fault-tolerant recovery, usage tracking, and stable performance under load.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer, SecureSync *India*

- Developed **object-oriented API integrations and AWS Glue transformations** for JSON, CSV, and Parquet data, improving response times **30%**, increasing data-pipeline efficiency **68%**, and reducing technical debt **20%**.
- Automated nightly builds, installations, **20+ unit and integration tests**, and reports through **Jenkins**, diagnosing failures and validating software behavior across Windows, Linux, and macOS release environments during continuous delivery.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern, VibrantChem *India*

- Implemented **eight scalable MERN services** for authentication, permissions, billing, resources, customers, leads, and notifications, integrating **2M+ records** through REST APIs, WebSockets, Azure SQL, and production business workflows.
- Automated **Docker deployments through Jenkins CI/CD** with unit, integration, and end-to-end validation, achieving **95%+ successful builds** while integrating monitoring and secure checks across staging and production environments.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Engineered a **cross-platform data pipeline** using Databricks, Flask APIs, and Firebase, enabling **real-time analytics across 50K+ records** with automated testing and integrated Web3 support for operational reporting workflows.
- Built **secure backend APIs** for a service-booking application covering reservations, time-slot selection, payment status, and tracking across **50K+ records**, supporting reliable data integration and customer-facing operational workflows.

Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML, CSS, C++
Frameworks & APIs: React.js, Node.js, Express.js, FastAPI, Flask, REST APIs, WebSockets, MERN
Data & Cloud: PostgreSQL, SQL Server, MySQL, MongoDB, Azure SQL, Firebase, AWS, Azure
Testing & Delivery: Git, Jenkins, CI/CD, Docker, Postman, Unit Testing, Integration Testing, End-to-End Testing
Engineering Practices: OOP, Data Modeling, ETL, Debugging, RCA, Agile/Scrum, JIRA, Code Reviews

Projects

Chat2SQL Code | *Java, TypeScript, SQL, PostgreSQL, Docker, Maven*

- Built a **cross-platform workspace for 10+ databases**, combining schema exploration, SQL generation, synchronization, and local deployment with Java, TypeScript, Docker, Maven, Node.js, and Yarn, improving developer productivity.

HMIS – Hospital Management Information System Live | *TypeScript, REST APIs, Appwrite, Twilio, Sentry*

- Built an operational application integrating **consent-based APIs**, appointment workflows, notifications, and Sentry monitoring, supporting **100+ daily appointments** while reducing administrative workload **30%** through reliable automation and visibility.

Linguistix | *Python, AWS, Docker, CodePipeline, ECS Fargate*

- Deployed a **containerized Python API on AWS** with CodePipeline and ECS Fargate, automating releases and validation while achieving **87% accuracy** and dependable production reliability for recurring workflows.
