Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Developer with 2+ years building **Java/JavaScript** applications with **OOP**, Azure, SQL, testing, **CI/CD**, and Agile delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *LA, California*

- Architected a scalable multi-tenant platform using **Azure SQL** and Blob Storage with row-level isolation and normalized schemas for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Built and maintained FastAPI integrations across PostgreSQL, SQL Server, and cloud storage, processing 5K+ monthly jobs with validation, reconciliation, error handling, and **CI/CD** releases sustaining 99%+ production reliability.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *LA, California*

- Developed responsive **React** interfaces and Flask services for uploads, grading history, and feedback, reducing turnaround by 60% while supporting 150+ instructors and 10K+ daily requests in production.
- Implemented concurrent batch processing and secure PDF, DOCX, and ZIP ingestion through **REST APIs** and AWS RDS, executing 1K+ files per batch with fault-tolerant recovery and usage tracking.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- Designed **object-oriented** API modules using Singleton and Factory patterns with AWS Glue and S3 transformations, improving response times 30%, pipeline efficiency 68%, and maintainability while reducing technical debt 20%.
- Automated nightly **Jenkins** builds, installations, unit and integration tests, and reports across three operating systems for cross-platform synchronization, collaborating with Microsoft and GitHub stakeholders throughout Agile sprint delivery.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Implemented eight modular **microservices** for authentication, resources, customer records, billing, leads, permissions, and notifications, synchronizing 2M+ records through REST APIs and event-driven WebSocket updates across business workflows.
- Developed responsive React workflows and automated Docker deployments through **Jenkins CI/CD**, achieving 95% build validation while integrating Azure SQL, monitoring, analytics, and secure release checks across environments.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Developed Flask APIs, payment webhooks, pricing, and booking workflows while synchronizing Firebase events and processing hourly Databricks micro-batches across 50K+ records with sub-200-millisecond responses for reliable mobile and web experiences.
- Translated client **requirements** into an end-to-end architecture, mapped 12+ integration points, and presented technical solutions to stakeholders, reducing design errors 25% while supporting collaborative cross-functional implementation planning.

Skills

Languages & Frontend: Java, JavaScript, TypeScript, HTML, CSS, React.js, Next.js, Angular.js, Python, C++, SQL
Backend & Data: OOP, Spring Boot, Node.js, Express.js, Flask, FastAPI, REST APIs, Microservices, PostgreSQL, SQL Server, Azure SQL
Cloud & Delivery: Microsoft Azure, Azure App Services, Blob Storage, AWS S3, AWS RDS, AWS Glue, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD
Testing & Practices: Unit Testing, Integration Testing, PyTest, Mockito, Jest, Mocha, Code Reviews, Agile/Scrum, SDLC, Requirements Analysis, Debugging, Cross-Functional Collaboration

Projects

Chat2SQL Code | *Java, JavaScript, TypeScript, HTML, Less, SQL, Maven, Docker*

- Built a **Java** and TypeScript database workspace supporting 10+ systems, accelerating SQL authoring, schema exploration, and data management through reusable backend services and a unified cross-platform interface.

HMIS - Hospital Management Information System Live | *TypeScript, MERN, REST APIs, Sentry*

- Built TypeScript services with consent-based REST APIs, **object-oriented** appointment workflows, Twilio alerts, and Sentry monitoring, supporting 100+ daily appointments and reducing administrative workload 30% through reliable automation.

FinNexus Live | *JavaScript, TypeScript, Kubernetes, MongoDB, WebSockets*

- Built a scalable JavaScript and TypeScript platform supporting 50K+ users and 1M+ transactions with real-time updates, secure integrations, **CI/CD pipelines**, and Kubernetes deployment automation for dependable operations.
